2024 PROFESSIONAL CATALOG

Access
the
inaccessible®

For more than 50 years, we've used our Petzl expertise and know-how to enable safer progression for customers who work in hazardous and dark environments. That's why professionals rely on our solutions every day — so they can get the job done right with the best possible tools. At Petzl, we thrive on innovation. It drives our work and keeps us on the cutting edge. So every customer can access their own inaccessible.

Explore the catalog and get to know our complete range, including new 2024 products! Happy reading and all the best!

Petzl.com

We
are **PETZL.**

This is
how we **see the world.**

We are committed to **creating safer places.**

For those who **work and play**
in the vertical and dark worlds.

For those who want **to access**
their own inaccessible every day.

We are **independent** and completely
free to choose our own endeavors.

To maintain **industrial excellence**,
paying attention to our impact.

To be pioneers in the pursuit of
perpetual innovation.

Sharing, educating, building. **Together.**

This is
how we **see the world.**

We
are **PETZL.**

Petzl Across the Globe

Petzl is a family business that, over the years, has become the largest European manufacturer of personal protective equipment for those who work and play in darkness or at height. All of our products are invented and developed at our headquarters in the heart of the French Alps.

Key Stats

The brand is present in over **55** countries.

85% of sales are made internationally.

More than **9** million products are sold every year.

10,000,000 people use Petzl personal protective equipment every day.

An International Presence

- Headquarters in the French Alps, in the town of Crolles
- American subsidiary in Salt Lake City, Utah
- Petzl subsidiaries and sales agencies: Austria, Benelux, Denmark, Finland, France, Germany, Italy, Norway, Spain, Sweden, Switzerland, UK, and China.

1,200 employees across the globe.

4 production sites: **3** in France and **1** in Malaysia.

Petzl subsidiaries and sales agencies:
Austria, Benelux, China, Denmark, Finland,
France, Germany, Italy, Norway, Spain,
Sweden, Switzerland, UK, USA.

Petzl Distributors

About Petzl

The Values That Motivate Us

For 50 years, Petzl has been built around four pillars, four fundamental values that motivate every decision we make: remaining a stable family business, encouraging innovation to imagine the best solutions, insisting on industrial excellence with the goal of zero defects, and remaining engaged with our communities by providing global best practices.

Learn more about each of our pillars.

■ 1. Family Ownership

Sébastien, Paul, and Olivier Petzl

Fernand Petzl and Daniel Gagneur in front of a scaling pole

Fernand in his workshop

Our story begins in the 1930s in southeastern France

That was when craftsman Fernand Petzl was introduced to caving. Back at his workshop after each excursion to the depths, Fernand imagined new tools for exploring darkness and heights. In 1968, he marketed his first products; in 1970, Petzl was born.

For decades, the Petzl family has built a stable environment that fosters creative solutions and industrial excellence. The new generation is rooted in these principles and ready to make new discoveries.

The Petzl family business is not listed on the stock market. We're proud of our independence; we make our own choices, take responsibility for our decisions, and maintain a long-term, sustainable vision for the future. The confidence and satisfaction of our customers, our dealers, and our partners drives everything we do.

© 2023 - Petzl Distribution - Marc Daviet

© 2021 - Petzl Distribution - VJedliczek

■ 2. Innovative Spirit

Innovations That Challenge Convention

With the introduction of the first headlamp in 1973, the legendary GRIGRI assisted blocking belay device in 1991, and the MAESTRO rescue descender in 2019, Petzl ingenuity has always pushed standard practices forward. Since the creation of Petzl in 1970, our objective has always been to make progressing in dark or vertical spaces safer and more comfortable.

Going Farther

As passionate pioneers, we delight in creating new opportunities for our users to venture into ever more committing terrain — to go farther and higher, to work more efficiently, to maximize safety and to make what was inaccessible today accessible tomorrow.

Simplicity, Durability, Efficiency

In every tool we design and construct, we prioritize simplicity, durability, and efficiency. For Petzl, being a pioneer has meant 50 years of passion, expertise, innovation, and continuous improvement. This approach to our craft and our business has allowed us to serve as a global expert, as we did in 2006 with the conception of the EXO personal escape system. At the request of, and in collaboration with, the firefighters of New York City, we were able to design an efficient solution that would allow easy escape in critical situations. It's an achievement that has been recognized with several awards, including best invention of the year by Time Magazine.

The Evolution of Petzl Headlamps

■ 3. Industrial Excellence

© 2020 - Petzl Distribution - Stéphane Candé

Beyond the Standards

We have a deep responsibility to the people who trust us with their lives, and we develop, test, and qualify all of our products above required standards. Our design center, based in France, integrates all crafts that are related to the creation of products: mechanical, textile, electronic, optical, and technological. From the design and prototype phases, the reliability of a product and the safety of the user are continuously evaluated, with particular attention to risks of use.

With labs dedicated to product testing, we conduct dynamic fall and impact resistance tests, perform cyclical testing, and evaluate performance, as well as beam quality and burn times of our headlamps. This process includes rigorous field testing in order to test the ergonomics and reliability during real-world use.

© 2023 - Petzl Distribution - Stéphane Candé

Zero Defects - PPE (Personal Protective Equipment)

Reliability is at the center of our concerns: our goal is for our products to consistently function at the same level of excellence.

Our objective is to allow zero defective products to leave our facilities, which involves processes with significant extra costs at every stage of production.

As we navigate an increasingly globalized economy, we go to great lengths to support our distributors and dealers, and we are heavily involved in the fight against counterfeit products.

Production and Inspection

Petzl's production sites are located in France, in the towns of Crolles, Eybens, and Rotherens, as well as in Rawang, Malaysia. Remaining competitive and keeping the majority of our production in France means that we continuously optimize our production lines and reduce our waste. This production infrastructure is complemented by long-term partnerships with key suppliers in Europe and Asia.

Our purchasing and quality control teams work closely with suppliers, ensuring to the best of our abilities, product reliability and quality that meets or exceeds our strict requirements. Quality inspection is present throughout every step of the production process: machine inspection of operations, human inspection at key points, further reinforcement by error-proofing systems and final individual inspection of each product.

We regularly audit the methods, quality management systems, and CSR practices (Corporate Social Responsibility) of our suppliers and strategic partners, especially when it comes to their employees.

© 2023 - Petzl Distribution - Stéphane Candé

■ 4. Community Engagement

Using Our Expertise to Serve Communities

Sharing technical knowledge and appropriate product uses is at the heart of what we do at Petzl. We produce high-quality technical content that is available to everyone and utilized by the different communities that we serve. With a focus on maximizing safety, this content is updated and enriched throughout the lifespan of our products to keep our customers informed and moving forward while they practice their sport or do their job.

International Collaboration

Across the world, we have partnerships with iconic athletes, influential figures, professionals who work in extreme conditions, NGOs, certifying bodies, and training centers operated by leading experts in the field. These collaborations help us co-create a world where we can all learn, share, and flourish. They also make it easier to promote best practices and standard uses. At the heart of our collaborations is always a passion for exploration, for a job well done, and for the pursuit of the inaccessible.

The Petzl Foundation is an integral part of Petzl.

Through the Petzl Foundation, we support and initiate projects that help prevent accidents, preserve the environment, and improve knowledge of the natural world around us.

More information about the Petzl Foundation can be found on page 106.

“More than ever before, we’re acutely aware that the choices we make today will have a lasting impact on the environment and will actively shape our own futures and the futures of our children. We’re committed to using our creativity and our capacity to innovate in service of sustainably reducing our impact in a continuous drive for improvement.”

Jerome Berton, CSR Manager
and Sébastien Petzl, Director of CSR

© 2023 - Petzl Distribution - Marc Daviet

Our approach to CSR is pragmatic, collaborative and positive. It's built on concrete actions, feedback from our stakeholders, and is solution-oriented, to encourage our teams and community to take action.

The safety and satisfaction of our customers remains our top priority. Beyond that, however, we're striving to create a more sustainable future.

Petzl has launched projects to improve our own economic, environmental, and social practices, as well as the practices of our suppliers in order to:

- Reduce our carbon intensity
- Reduce, reuse, and recycle our waste
- Improve our employee satisfaction
- Improve the labor conditions of our suppliers

Corporate Social Responsibility

Four Actionable Commitments

At Petzl, we're focused on four commitments that respond to the primary concerns of over 2,000 of our internal stakeholders (employees, subsidiaries, family shareholders) and external stakeholders (clients, users, suppliers, associations, and NGOs). We are manifesting these four commitments through hands-on projects with measurable outcomes.

■ Reduce Our Carbon Intensity

In 2020, we worked with Carbone 4 to measure the comprehensive carbon impact of our operations in 2019 — from the extraction of raw materials to the end of a product's life. Our footprint was equal to 45,000 metric tons of CO₂. Three areas accounted for 75% of our emissions: raw materials (34%), transport of goods (24%), energy used to power our headlamps (17%).

In 2021, we created initiatives to reduce our carbon footprint: prioritize the use of materials with the least impact, improve the durability and reparability of our products, shrink the distances our goods travel, and reduce our energy consumption.

By 2030, our goal is to reduce our total carbon footprint by 50% per euro in sales.

© 2023 - Petzl Distribution - Stéphane Candé

■ Reduce, Reuse, and Recycle Our Waste

The waste from our industrial and commercial operations produces a variety of pollutants. We're taking action in our factories, warehouses, and offices to reach three objectives by 2025:

- Eliminate single-use plastics in our packaging and supply chain
- Reuse 50% of our cardboard and palettes, recycle the rest
- Recycle 80% of our metal, plastic, cardboard and wood waste, put the rest towards energy recovery

© 2023 - Petzl Distribution - Stéphane Candé

[Learn more](#)

■ Improve Our Employee Satisfaction

Our strong and consistent growth, coupled with the complex issues of the pandemic, has the potential to affect employee health. In 2021, we evaluated the satisfaction of all Petzl employees in France using the Wittyfit platform. The survey covers topics including organization and work load, autonomy, work/life balance, recognition, as well as purpose and values.

Using the results, we created action plans to improve satisfaction — some carried out by leadership and others co-created and led by the teams.

In 2023, this satisfaction audit was extended to all Petzl employees on a global level.

© 2023 - Petzl Distribution - Stéphane Candé

■ Improve the Labor Conditions of Our Suppliers

Since 2010, our responsible purchasing initiative has aimed to ensure that all our suppliers comply with the Petzl code of conduct. This code aligns with International Labor Organization (ILO) directives:

Our objectives are to improve social, environmental, health, and safety practices at all of our suppliers.

We've created an annual evaluation of CSR practices for suppliers representing 80% of our purchases. We've offered reinforced support for 25% of our suppliers in their continued improvement plans. We are also collaborating with other manufacturers to combine our audit efforts and reaffirm our CSR standards for common suppliers.

Fall-Arrest Lanyards

This year, we're updating the complete range of ABSORBICA® lanyards. The range will retain the same structure: I models with a single arm and Y models with double arms (in European or international versions), as well as an -I VARIO and -Y TIE-BACK. However, they now have a new, even more compact absorber, and new MGO connectors on international versions.

ABSORBICA®-I Lanyards

ABSORBICA®-Y Lanyards

Packs

The wait is over. New TRANSPORT packs are now available in three volumes: 30, 45, and 60 liters. They're now more adaptable to user needs at different worksites.

ePPEcentre Application

ePPEcentre is a Petzl application designed for professionals to facilitate PPE management

© 2023 - Petzl Distribution

Available for desktop or mobile, the ePPEcentre application makes it easier to manage PPE. Add a Petzl product by simply scanning its datamatrix: all information related to the product will automatically show up on the dedicated page, grouping all the information necessary for management and tracking. All the products in your existing inventory can easily be imported into the application. Products from other brands can also be logged manually. The dashboard, located on the

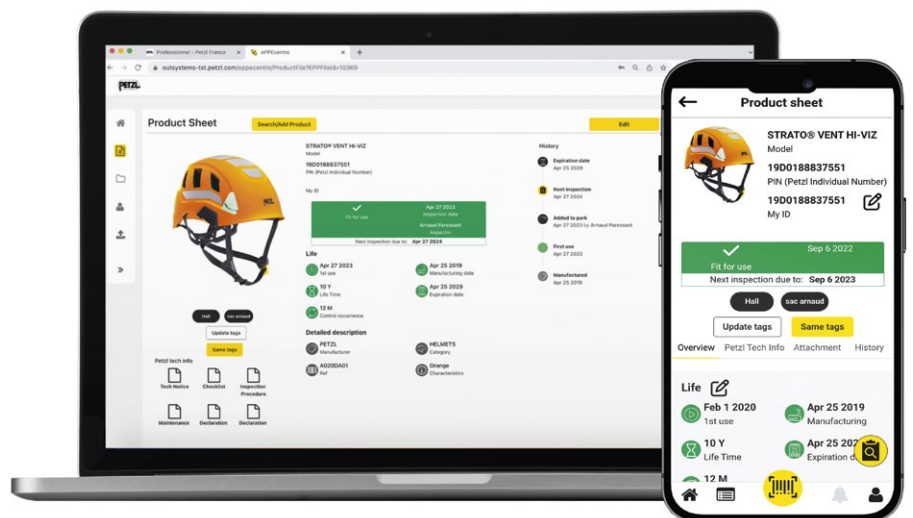

Homepage, allows the user to view all important data on a single page: number of products in use, products in repair, PPE inspections that need to be completed in the coming days, weeks, and months, as well as products that are approaching the end of their lifespan. The PPE database can be structured according to different work methods or to meet specific industry needs. You can group products based on location, users, or even product families.

ePPE CENTRE

Petzl products can be added by simply scanning the datamatrix. All information related to the product will automatically show up on the dedicated page:

- General information (product name, photo, product reference, product family)
- Date of manufacture
- Lifespan
- Inspection frequency
- Product retirement date
- Instructions for use
- PPE Inspection Procedure and Checklist

More information at [Petzl.com](https://www.petzl.com)

Available in early 2024 on the App Store and Google Play.

VERTICALITY

GENERAL PRINCIPLES OF WORK AT HEIGHT

Warning

- You must have understood and retained the information from your products' Instructions for Use to be able to apply the techniques presented in this document.
- Learning appropriate techniques and methods of protection is your own responsibility. Petzl solutions are given for information purposes only, with no guarantee of their effectiveness in your specific working situation. The relevance of these solutions varies by context, so always carry out your own risk assessment in the field
- Mastering the techniques presented here requires specific training and practice. Work with a specialized organization for all of your training activities.

General Information About Falls

The risk of falling is a key concept to master when working at height. The severity of a fall depends on independent factors:

• The weight of the user, including equipment:

The greater the weight, the more energy to be dissipated during the fall.

• The length of the fall:

The longer the fall, the more energy to be dissipated during the fall. The risk of hitting an obstacle is also greater.

• The position relative to the anchor:

When the worker moves above their anchor, the severity of the potential fall increases. The fall factor concept is sometimes used to describe the worker's position relative to the anchor and the severity of the fall. This concept applies to climbing, restraint, or work-positioning situations, when a dynamic rope lanyard is used.

Precautions for the type of system used: the Instructions for Use specify the limitations for use of equipment, particularly in terms of fall distance and the worker's position relative to the anchor.

Restraint

A restraint system limits the work zone, to help prevent the worker from entering an area that may present a fall risk. This system is not designed to arrest a fall from height.

Fall Arrest

The fall-arrest system is a belay system that is independent of the means of progression or work positioning.

The fall-arrest system prevents the user from falling to the ground in the event of a fall. Its role is to arrest the fall while limiting the impact force experienced by the user. It must therefore be used with enough clearance to allow for an unobstructed fall.

Work Positioning

A work-positioning system supports the user and allows them to be precisely positioned with the weight on their feet. This system is not designed to arrest a fall; the user must keep their body weight on the positioning system.

The work-positioning system must be used together with a fall-arrest system.

Suspension

The user is working while suspended when they no longer have any weight on their feet, but are supported primarily by the harness. The load is thus shared between the waistbelt and the leg loops/seat.

Impact Force

A fall-arrest system helps limit the impact force sustained by the user.

It is typically made up of an energy absorber that tears in order to limit the forces over a given stopping distance.

A dynamic rope lanyard has a low capacity for energy absorption. Its use requires taking great precautions: reducing the potential fall distance and staying in a work position below the anchor.

A webbing lanyard or a cable with no capacity for energy absorption cannot be used to arrest a fall.

Example for 100 kg

JANE or PROGRESS lanyard without energy absorber

Lanyard with ABSORBICA-I or Y energy absorber

Clearance

Clearance is the minimum amount of clear space below the user that prevents the user from hitting an obstacle in the event of a fall.

Clearance takes into account:

- Weight of the user
- Length of the fall
- Tearing length of the energy absorber
- Average height of the user
- Safety margin of 1 meter

Clearance Value

The tearing length of the energy absorber, depending on the fall, can only be known based on the manufacturer's information; this is why a clearance estimate is suggested in the Instructions for Use for each fall-arrest device.

To learn more about calculating clearance, see the technical information available at www.petzl.com

PETZL.COM

Anticipating the Means of Rapid Evacuation

• Limiting the effects of inert suspension:

In the event of a fall where the worker loses consciousness or is incapacitated, inert suspension in the harness presents a mortal danger requiring an urgent response. Work teams must be equipped and trained to quickly evacuate an injured team member.

• Evacuating a victim without assistance:

Procedures for evacuating workers should be determined whenever a new worksite is established.

Releasable systems can be created when installing work ropes to allow evacuation from below.

Working alone must be prohibited: a worker may find themselves alone at height, but at least one person trained in evacuations should be present and equipped on site.

TRANSPORT 30/45

Rope access work situations often involve environments at significant height. Work can be performed outside or inside, or even in confined spaces, and is not all suited to collective protection. Work done in confined spaces carries additional difficulties related to lack of space and lack of means of autonomous progression.

Examples of operations:

- Placement of rockfall or stabilization nets over a road
- Structural inspection (such as bridge pilings)
- Exterior window cleaning on skyscrapers
- Inspection of tanks

Technical specifics:

- The work area is accessed with ropes by specialized workers trained in rope access techniques
- Access from above is preferred, as it is safer and simpler to set up

Rope Access

Installing Ropes

Load-sharing anchors with the rope.

Bunny knot (for load-sharing anchors).

Special case: isolating a section of damaged rope with a butterfly knot.

Stopper knot.

Fixed anchor.

Releasable anchor.

Temporary adjustable anchors.

To wrap around an existing structure by precisely adjusting the length of the anchor.

Large structures.

Structures requiring specific positioning.

Temporary anchors with multiple configurations.

To best adapt to a situation, whether by connecting directly to the anchor, or connecting to a structure by wrapping around it or using a choker hitch.

CONNEXION VARIO 0.3 - 4 m

WIRE STROP 0.5 - 3 m

ANNEAU 0.6 - 1.5 m
ST'ANNEAU 0.24 - 1.2 m
PUR'ANNEAU 0.6 - 1.8 m

How to use the WIRE STROP

Rope Access

Gated ventral attachment point on ASTRO harnesses

The ventral attachment point on ASTRO harnesses is gated for optimal integration of equipment.

Lowering

The RIG descender attaches to the large metal D.

The PODIUM seat connects to the pin with shackles, allowing a direct connection to the descender while preserving ventral attachment point mobility.

For easy installation and removal

Ascending

The CROLL ventral rope clamp connects to the small metal D for greater efficiency on rope ascents.

Passing Intermediate Anchors

The PROGRESS ADJUST-Y lanyard connects directly to the pin, eliminating the need for a connector.

1. Combined lowering/raising system

- Advantage: quick transitions between modes (lowering/raising)
- Disadvantage: rope length is four times the travel distance

How to use the TWIN RELEASE

2. Independent lowering/raising systems

- Advantage: the length of the rope equals the travel distance
- Disadvantage: rigging is required to transition between lowering and raising

TREE CARE

Arborists at work, Ancey, France © 2022 Petzl Distribution - Marc Daviet - Canopée Verticale - Liber' Tree

PETZL SOLUTIONS

STRATO VENT
+ VIZEN MESH
+ Nape protector

SEQUOIA

ZIGZAG PLUS

NAJA

FLOW 11.6 mm

TRANSPORT 30/45

Not all tree work can be done using exterior means such as elevated platforms or ladders. In this case, to move and work, the arborist uses rope progression techniques.

Examples of operations:

- Ornamental tree trimming, to adapt the tree to its environment or to change its overall aesthetic
- Maintenance trimming to remove dead wood and dying branches
- Tree removal (progressive cutting of the trunk from the top) if diseased or presenting a hazard

Technical specifics:

- Access from the base of the tree generally starts by throwing a weighted bag with line attached, which is used to install the access rope on an anchor up in the tree
- While moving about on the branches, the arborist keeps their weight on the work rope, for greater stability and to reduce potential fall distance
- When using any cutting tool (handsaw, chainsaw), the arborist must use two independent belay systems

Tree Access

Doubled rope ascent technique

The arborist ascends the access rope (purple). In the event of a problem, such as a hornet attack, they can self-evacuate with the work rope (blue). A mule knot or releasable knot secures the ZIGZAG.

This versatile ascent technique is adaptable to many situations and allows an access rope to be available during work.

Single rope ascent technique

The access rope is attached to the base of the tree and runs through an appropriate anchor in the tree. It will also be used for work. On a single rope, the ZIGZAG must only be used with the CHICANE.

This technique allows for rapid rescue and efficient climbing with the KNEE ASCENT knee ascender.

See the Instructions for Use for ZIGZAG, ZIGZAG PLUS, CHICANE, and KNEE ASCENT LOOP supplied with your devices, or available at www.petzl.com

PETZL.COM

Movement Within the Tree

Moving within the tree with two anchors

Using two systems simultaneously on two separate anchors provides optimal balance while cutting and facilitates movement.

How to install and retrieve the EJECT friction saver using a doubled rope system

How to Use NAJA on a Single Rope (SRS)

How to Use NAJA on a Doubled Rope (MRS)

EJECT and NAJA can be used on a single rope (SRT/SRS) with a stopper knot.

The knot can be placed to the left or right of the pulley. Reference installation and retrieval details at www.petzl.com

To learn more about access and progression techniques, see the technical information available at www.petzl.com

ENERGY AND NETWORKS

These fields are characterized by structures such as towers, antennas, and wind turbines. The modes of progression are varied and directly related to the structure itself.

Examples of operations:

- Work on high tension lines
- Tower construction
- Maintenance operations in wind farms

Technical specifics:

- The user generally progresses using a permanent fall-arrest system such as a lifeline, cable, or rail
- Without access to these, the user must maximize their own safety using personal protective equipment: energy-absorbing lanyard or mobile fall arrester on rope

PETZL.COM

Dropped object prevention solution

All products in this range allow you to adapt your setup based on the weight and type of tools that need to be tethered.

Examples of possible combinations:

Reduce Fall Distance

The longer the free fall, the greater the absorber deployment will be. The required minimum clearance (distance between the user and an obstacle), should therefore be greater than those values combined.

User weight, lanyard length, and position in relation to the anchor can affect these values.

It's possible to reduce fall distance before leaving the ground or once you've already started working at height.

- **Before leaving the ground: choose your fall-arrest system**

The total length of the system determines maximum free fall distance.

- **While at height: choose your anchor**

The simplest way to reduce fall distance is to use the highest anchor possible in relation to your work position.

Using an adjustable lanyard allows you to adjust the length of your fall-arrest system and therefore reduce fall distance while adapting to work situations.

FRAMING AND ROOFING

At this type of work site, the risk of slipping and falling is higher. A safety device must be installed to guard against these hazards.

Examples of operations:

- Framing a building under construction
- Roof repair or waterproofing
- Roof inspection on industrial sites

Technical specifics:

- When the situation allows, accessing the work area is done using an elevated work platform and the worker secures themselves with an energy-absorbing lanyard
- Lacking collective protection, the worker is required to use a fall-arrest system
- Fall-arrest systems are also required when installing collective protection

GENERAL RESCUE PRINCIPLES

Inert suspension in a harness, even for a short time, can cause serious physiological harm. In the event of an accident, it is important to respond quickly with the appropriate technique.

Self-Rescue

On sites where the main access could be cut off by fire, people must be ready to quickly evacuate the building. They have evacuation kits. These kits are either portable or installed permanently on the structure. When there is no existing anchor, a hook-based system can be used. In both cases, teams must be regularly trained so they don't panic in the event of a fire.

On-Site Rescue

When a worksite is being set up, the company must establish a risk prevention plan (inventory of risk situations):

1. It must protect the personnel from falls from height. The solutions chosen, whether collective or individual, must protect the team members while they work.
2. In the event of an incident, the company must be prepared with rescue systems for accessing, releasing, and evacuating the victim. These solutions are established with:
 - Ready-to-use rescue kits, adaptable to many situations and simple to use
 - Personal equipment for the worker at height (solution requiring experienced and well-trained teams)In both cases, the teams undergo regular training, so they can respond quickly in the event of an accident.

Technical Rescue

Technical rescue teams must be able to respond quickly in any situation. They must choose the quickest, most effective way to access the victim.

- When access is easy or possible by motorized means, they can easily transport the rescue equipment
- In more difficult access situations, they may use rope access techniques from above or below, and their equipment will be lightweight and versatile
- Finally, a helicopter can be used when victim access is complicated and/or remote, for example in the mountains

Cable Lift Evacuation

Cable lift evacuation operations follow an evacuation plan. Rescue kits are put together to meet the specific needs of each operator.

1. Accessing the victim

Accessing the victim can sometimes be complicated. Rope access techniques are used in these cases. When access is possible from above, rescuers use rope descent techniques. If an access rope is in place, rescuers can ascend the rope using handled and ventral rope clamp techniques. In other situations, rescuers are obliged to use climbing techniques to reach the victim.

Example of access from above

Example of access from below

2. Releasing the victim

Raising

This involves using a mechanical advantage pulley system in order to easily raise the victim. A rescuer working alone uses a mechanical advantage system to reduce effort. The disadvantage is that a long rope is required. If there are enough rescuers, a lower mechanical advantage is used to speed up the operation.

Counterbalance technique

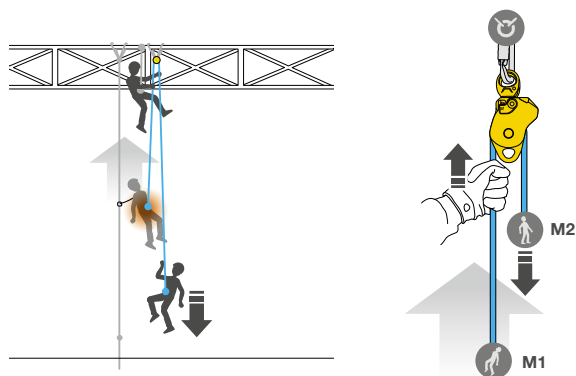

This is a counterweight system. The rescuer is on one side, the victim on the other. The rescuer unweights the rope on the victim's side by pulling upward. The victim ascends and the rescuer descends.

The advantage of this system is that it is easy to do with little equipment. Engaging the counterweight is the step that demands the most energy. After that, it is important to be careful to keep the system under control. Beware when there is a significant weight difference between the rescuer and the victim.

Rope clamp for hauling

Example of counterbalance

3. Evacuating the victim

Downward, the evacuation is done with a descender.

This is the easiest technique currently in use. When downward evacuation is impossible, the victim is evacuated upward or horizontally. Upward, rescuers use either a counterweight or hauling technique. Horizontally, one or more ropes are tensioned. One rope is used for carriage, another is used as a back-up belay, and another to move the litter.

Downward

Upward

Horizontally

SELF-RESCUE

The typical scenario is of a firefighter trapped inside a burning structure. They need to be able to self-evacuate and must have the appropriate equipment to do so.

Technical specifics:

- In this situation, the firefighter must be able to take advantage of any available anchor point inside the building, or as a last resort, a window sill
- The exit generally takes place in an extremely hot, smoke-filled, and hostile environment, adding to the limitations
- The maneuvers must be as simple as possible, for quick action even under intense duress

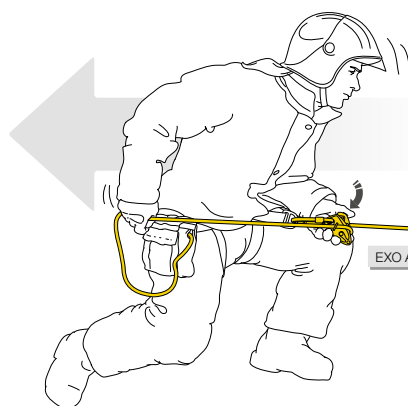

Firefighter training, United States © 2019 - Petzl Distribution - ROH - SLC FIRE DPT

EXO AP HOOK

EXO AP HOOK is a personal escape system with an anchor hook, designed for situations where the possibility of finding an anchor point is uncertain. It has a self-braking system with anti-panic function for quickly moving horizontally, climbing through a window, and controlling or stopping a descent. If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically.

Rapid horizontal movement

Going through a window while maintaining the anchor hook on the window sill. Locking the left leg against the interior wall to control the movement.

Re-establishment below the window while holding the free end of the rope.

Descending, one hand uses the handle to start the descent, and the other hand holds the rope to control it.

Anti-panic function

ON-SITE RESCUE

If a victim is not able to self-rescue, the on-site work team has to respond immediately and move them to safety.

Examples of operations:

- A team member accesses the victim, unhooks them, then lowers the victim unaccompanied
- A team member accesses the victim, releases them, then rappels down with the victim
- The victim is suspended on a pre-installed evacuation system that does not require a team member to access them directly

Technical specifics:

- Unaccompanied evacuation can generally be done using a ready-to-use rescue kit
- Accompanied descent requires proper training, as it implies a mastery of advanced rope access techniques
- In all cases, the rescue method should be as rapid as possible, in order to reduce the risk of suspension trauma, especially when the victim is unconscious

XENA

On-Site Rescue

Release and evacuation of a victim on a CROLL

Rescue from below by a team member with their own equipment. The rescuer must carry out a risk assessment before responding and verify (among other things) that the victim's ropes are in good condition. The counterbalance system is used to transfer the victim onto the descender.

The rescuer ascends on the victim's safety line.

1. The rescuer transfers themselves to the RIG descender, tethers to the victim, and moves the ASAP up above the victim.
2. The rescuer puts a second connection in place. They can then remove the equipment that is in the victim's way.

3. On the victim's rope, the rescuer installs a foot loop in counterbalance on the ASCENSION handled rope clamp.

4. In counterbalance on the foot loop, the rescuer prevents the rope from running through the CROLL and raises the victim. They remove the CROLL and take up as much rope slack as possible in the RIG descender.

5. The rescuer, hanging on the RIG, removes the ASCENSION. They install a braking carabiner and accompany the victim to the ground.

Release and rescue using a reversible rescue kit

- Unaccompanied evacuation (victim doesn't require monitoring or for a free-hanging evacuation):

1. Victim suspended by a lanyard, with the energy absorber torn by the fall.
2. Hauling (allows the victim to be released).
3. Lowering the victim.

To learn more about using the JAG RESCUE KIT to rescue a victim, see the technical information available at www.petzl.com

STRATO VENT HI-VIZ

FALCON MOUNTAIN

MINI TRAXION

MAESTRO S

NEW
2024

TRANSPORT 45/60

Technical rescue teams respond when the situation is especially difficult and requires significant resources to be deployed.

Rescue examples:

- Following a vehicle roll-over into a ravine, the victims are rescued via motorized means
- Evacuation of an injured worker from a location that is difficult to access
- Helicopter rescue operations in mountainous terrain

Technical specifics:

- Technical rescue teams have to operate in a variety of terrain types and have complete mastery of progression and belay techniques on a rope
- When the terrain allows, downward evacuation is preferred because of the gravity-assist
- Upward evacuation is a team effort that requires perfect coordination by everyone involved and demands techniques which are sometimes particularly complex, such as creating a haul system using lightweight pulleys or counterweight techniques

Technical Rescue

Using the MAESTRO

The MAESTRO enables controlled lowering of loads up to 250 kg (MAESTRO S) and 280 kg (MAESTRO L).

Different braking positions
Improve descent control by adjusting the friction.

To learn more about MAESTRO performance, see the technical information for hauling and lowering at www.petzl.com

PETZL.COM

Rope redirect with SPIN L1D pulley

Rope redirect when raising: sheave rotates in the direction of the ascent.

Extra friction makes for a more comfortable descent: the sheave does not rotate, and the facets provide additional friction on the rope.

Hauling with MAESTRO or PRO TRAXION

The mechanical advantage of a haul system is a theoretical advantage, but efficiency is affected by several factors in practice, including pulley efficiency, rope diameter, rate of hauling, and regularity of movement.

Here are some test results using a constant rate of 1.5 m/minute. Other results are available in the technical information at www.petzl.com

Simple directional (1:1)

Haul system (3:1)

Lowering with two MAESTROs in parallel, controlled by a single operator

One operator simultaneously controls the two devices to optimize load-sharing between the two ropes, while limiting the potential fall distance in case one rope fails.

MAESTRO X2

How to belay with the MAESTRO on a back-up rope

ROLLER COASTER

Addition of a back-up system to address potential operator error.

Evacuation on a tensioned highline with REEVE

The REEVE combines two pulleys with a rigging plate for clean and compact rigging of your highline rescue system.

How to use the REEVE

Adjusting position of the litter attendant with JAG SYSTEM

The JAG SYSTEM allows the attendant to efficiently adjust their position, even with all of their weight on the lanyard and without good support for the feet.

For more information, see technical tips at www.petzl.com

CABLE LIFT EVACUATION

If cable lift equipment fails, the operations manager must evacuate passengers according to the evacuation plan. This evacuation must be done within a predefined time frame and is generally conducted by the operations staff.

Technical specifics:

- Accessing the passengers is done by moving along the cable, from the towers
- These operations are managed simultaneously by multiple autonomous teams, generally made up of:
 - Someone suspended on the cable who evacuates passengers and whose movements are protected by a team member on the tower
 - Someone on the ground who receives passengers and guides the movement of the team member on the cable
- The success of these operations hinges largely on the instruction, training, and practice of the operations staff (at least once a year)

Cable Lift Evacuation

Chairlift evacuation with rescuer on cable

Chairlift evacuation techniques can differ greatly between various sites. Techniques are chosen based on the slope of the cable, the ground clearance, the recovery zone, or other variables.

Training is required for a successful and timely execution of this operation.

1. Rescuer accessing the chair

Back-up belay may be done from the tower. This allows for a mutual verification of the system before the rescuer moves onto the cable. The rescuer is suspended on the ROLLCAB, and the GRILLON lanyard is slightly slack to allow descent along the cable.

Products included in the rescue kit:

- PITAGOR
- I'D EVAC
- CONNECTION FIXE
- ROLLCAB
- SWIVEL OPEN
- PAW S
- JANE
- GRILLON
- MGO OPEN
- GO x 4
- Am'D x 4
- CAPTIV x 3
- AXIS 11 mm with sewn termination

How to carry out a chairlift evacuation

2. Evacuating the passenger

The rescuer descends on the GRILLON lanyard to the chair. They install the PITAGOR rescue triangle on the passenger, then evacuate them with an I'D EVAC descender.

HELMETS

Essential for work at height and certain industrial activities, helmets provide the user with effective protection from falling objects, or in the event that the user falls.

Helmets

Essential for work at height and certain industrial activities, helmets provide the user with effective protection from falling objects, or in the event that the user falls. With a very secure fit, Petzl helmets are comfortable to wear in a variety of different situations. With a complete line of entirely modular accessories, they meet the diverse needs of professionals.

• Excellent fit on the head

CENTERFIT adjustment

The CENTERFIT adjustment system allows the helmet to be perfectly centered on the head. The headband is easy to adjust by simultaneously rotating the two side adjustment wheels, even while wearing gloves.

FLIP&FIT system

The FLIP&FIT system immediately positions the headband in a low position, to provide a secure fit on the head. The headband folds into the shell for easy storage and transport.

• DUAL chinstrap strength is adjustable, to adapt to a variety of different work situations

The DUAL chinstrap allows the worker to adjust chinstrap strength in order to adapt the helmet to different environments: work at height (EN 12492) or on the ground (EN 397).

The clip has two positions, corresponding to the following two uses:

- Higher strength to limit the risk of the helmet coming off in a fall (strength > 50 daN)
- Lower strength to limit the risk of strangulation, by releasing if snagged when user is at ground level (strength < 25 daN)

Solution for Different Protection Needs

		Helmets With Unventilated Outer Shell		Helmets With Ventilated Outer Shell	
		VERTEX	STRATO	VERTEX VENT	STRATO VENT
  PENETRATION PROTECTION IMPACT PROTECTION	Protection against falling objects	●			●
 VENTILATION	Ventilation holes allow airflow through the helmet		-		●
 ELECTRICAL PROTECTION	Protection against electrical hazards	●			-
 MOLTEN METAL PROTECTION	Protection against molten metal splash	●		●	-
 LATERAL DEFORMATION	Protection against lateral deformation	●			●

Helmets

• A variety of choices

Available in assorted colors

VERTEX helmets are available in seven standard colors; STRATO helmets are available in four colors. VERTEX and STRATO helmets are also available in two HI-VIZ versions, with a fluorescent outer shell (yellow or orange), phosphorescent clips, and reflective bands for optimal visibility of the worker, day or night.

Multiple certifications

Depending on the model, Petzl helmets meet the requirements for the following certifications:

- European EN 397, EN 12492 and EN 50365
- British UKCA
- American ANSI Z89.1
- Canadian CSA Z94.1
- Russian EAC
- Australian AS/NZS 1801
- Chinese GB 2811

• Easy to install and modular design

All Petzl helmets can be adapted to additional needs for protection or lighting in just a few seconds, thanks to the EASYCLIP system and a variety of inserts.

EASYCLIP

The EASYCLIP system allows quick installation of a protective shield. EASYCLIP is easy to install and is compatible with all Petzl helmets and shields. It comes with every protective eye and face shield.

• Petzl Custom for helmets

CUSTOM

Petzl Custom can:
- Customize the helmet with a logo and reflective stickers
- Pre-mount Petzl eye and face shields and accessories of your choice onto the helmet for a ready-made solution, with each helmet delivered in an individual transport pouch. Available for orders of 20 helmets or more.

• Comfortable construction

VERTEX helmets have a six-point webbing suspension system, conforming to the shape of the head for maximum comfort. Shock absorption is achieved through deformation of the external shell.

• Lightweight construction

The liner of STRATO helmets is designed in two parts: EPP (expanded polypropylene) and EPS (expanded polystyrene), for reduced weight. Shock absorption is achieved through deformation of the liner.

VERTEX and VERTEX VENT helmets

VERTEX®

Comfortable helmet

The VERTEX helmet is very comfortable, with its six-point textile suspension and CENTERFIT and FLIP&FIT systems, which provide a secure fit on the head. The adjustable-strength chinstrap makes it ideal for both work at height and on the ground. The unventilated outer shell protects against electrical hazards, molten metal splash, and flames. With its potential for integration of a Petzl headlamp, hearing protection, and multiple accessories, it is an entirely modular helmet, meeting the additional needs of professionals.

VERTEX® HI-VIZ

Comfortable high-visibility helmet

The high-visibility version features a fluorescent outer shell with phosphorescent clips and reflective bands for optimal visibility of the worker, day or night.

VERTEX® VENT

Comfortable ventilated helmet

The VERTEX VENT helmet is very comfortable, with its six-point textile suspension and CENTERFIT and FLIP&FIT systems, which provide a secure fit on the head. The adjustable-strength chinstrap makes it ideal for both work at height and on the ground. Ventilation holes with sliding shutters allow airflow through the helmet. With its potential for integration of a Petzl headlamp, hearing protection, and multiple accessories, it is an entirely modular helmet, meeting the additional needs of professionals.

VERTEX® VENT HI-VIZ

Comfortable, ventilated, high-visibility helmet

The high-visibility version features a fluorescent outer shell with phosphorescent clips and reflective bands for optimal visibility of the worker, day or night.

STRATO and STRATO VENT helmets

STRATO®

Lightweight helmet

The STRATO helmet is very lightweight and comfortable, with CENTERFIT and FLIP&FIT systems which provide a secure fit on the head. The adjustable-strength chinstrap makes it ideal for both work at height and on the ground. The unventilated outer shell protects against electrical hazards, molten metal splash, and flames. With its potential for integration of a Petzl headlamp, hearing protection, and multiple accessories, it is an entirely modular helmet, meeting the additional needs of professionals.

STRATO® HI-VIZ

Lightweight, high-visibility helmet

The high-visibility version features a fluorescent outer shell with phosphorescent clips and reflective bands for optimal visibility of the worker, day or night.

STRATO® VENT

Lightweight, ventilated helmet

The STRATO VENT helmet is very lightweight and comfortable, with CENTERFIT and FLIP&FIT systems which provide a secure fit on the head. The adjustable-strength chinstrap makes it ideal for both work at height and on the ground. Ventilation holes allow airflow through the helmet. With its potential for integration of a Petzl headlamp, hearing protection, and multiple accessories, it is an entirely modular helmet, meeting the additional needs of professionals.

STRATO® VENT HI-VIZ

Lightweight, ventilated, high-visibility helmet

The high-visibility version features a fluorescent outer shell with phosphorescent clips and reflective bands for optimal visibility of the worker, day or night.

How to install a face shield

VIZIR

Eye shield with EASYCLIP system for VERTEX and STRATO helmets

The VIZIR eye shield protects the eyes against projectile hazards. It is easy to install on VERTEX and STRATO helmets with the EASYCLIP attachment system. It also has scratch-resistant and anti-fog coatings.

VIZIR SHADOW

Tinted eye shield with EASYCLIP system for VERTEX and STRATO helmets

The VIZIR SHADOW eye shield provides eye protection against projectile hazards. It is easy to install on VERTEX and STRATO helmets with the EASYCLIP attachment system. It has a level 2.5 solar protection filter, and anti-scratch and anti-fog treatments.

VIZEN

Face shield for protection against electric arc hazards, with EASYCLIP system for VERTEX and STRATO helmets

The VIZEN face shield protects against electric arc hazards. This full-coverage shield offers face and eye protection while preserving peripheral vision. It is easily installed on VERTEX and STRATO helmets using the EASYCLIP attachment system. It also has scratch-resistant and anti-fog coatings.

VIZEN MESH

Face shield for tree care for VERTEX and STRATO helmets, with EASYCLIP system

The VIZEN MESH face shield protects against flying wood chips and shavings. This full-coverage shield offers complete face protection while providing good visibility. It is easily installed on VERTEX and STRATO helmets using the EASYCLIP attachment system.

Nametag Holder for VERTEX® and STRATO® Helmets

The nametag holder for VERTEX and STRATO helmets allows quick identification of the worker. It is easy to install and provides effective rain protection for business cards.

Nape Protector for VERTEX® and STRATO® Helmets

The nape protector for VERTEX and STRATO helmets provides effective sun and rain protection for the nape of the neck. Fluorescent colors give the worker optimal visibility, night and day. Available in two colors.

Protector for VERTEX® Helmet

The protector for the VERTEX helmet is easy to install and protects the shell from soiling and splash.

Protector for STRATO® Helmet

The protector for the STRATO helmet is easy to install and protects the shell from soiling and splash.

Storage Bag for VERTEX® and STRATO® Helmets

Storage bag to protect VERTEX and STRATO helmets during storage and transport. Accessories are also protected in a closed interior compartment.

DUAL Chinstrap for VERTEX® and STRATO® Helmets

This chinstrap can be used to change or replace the chinstrap of VERTEX and STRATO helmets. It allows the worker to modify chinstrap strength in order to adapt the helmet to different environments: work at height or on the ground. Available in two colors and in a long version.

Helmets

Accessories

Headband With Comfort Foam for VERTEX® and STRATO® Helmets

Ready-to-install headband with comfort foam (standard or absorbent), to extend the life of a VERTEX or STRATO helmet. Pack of 5.

Comfort Foam for VERTEX® and STRATO® Helmets

Comfort foam (standard or absorbent), to be installed on the headband of a VERTEX or STRATO helmet, to prolong its life.

Upper Foam for STRATO® Helmet

Upper foam installs on the liner of the STRATO helmet, to extend its life. It is comfortable, absorbent, and machine-washable.

Transparent Stickers for VERTEX® and STRATO® Helmets

Transparent stickers allow VERTEX and STRATO helmets to be customized using a permanent marker or laser printer.

Reflective Stickers for VERTEX®

Reflective stickers for increased visibility of VERTEX helmets.

Reflective Stickers for STRATO®

Reflective stickers for increased visibility of STRATO helmets.

Hats and Balaclava

Buff® is a trademark and property of Original Buff®

LINER

Breathable cap for wicking perspiration

LINER is a breathable cap for wicking perspiration and drying quickly. The seamless fitted design makes it comfortable to wear under a helmet, without getting in the way.

BEANIE

Protective cap for cold and wind

BEANIE is a cap that protects the head on cold and windy days. The design, specific to each zone, optimizes thermal insulation and regulates moisture. The seamless fitted design and side vents make it comfortable to wear under a helmet, without getting in the way.

BALACLAVA

Balaclava for protection against cold and wind

BALACLAVA protects the head, face, and neck on cold, windy days. The design, specific to each zone, optimizes thermal insulation and regulates moisture. The seamless fitted design and multiple side vents make it comfortable to wear under a helmet, without getting in the way.

(1) Meets all requirements of the EN 397 standard, except the requirement for internal vertical clearance. (2) Partly meeting the CE EN 397 standard. (3) Lower strength (< 25 daN) limits risk of strangulation, by releasing if snagged when user is at ground level. (4) Higher strength (> 50 daN) limits risk of helmet coming off in a fall. (5) For VERTEX Canada version. (6) Meets all requirements of the EN 12492 standard, except the ventilation requirement.

HARNESSES

Simple to use, comfortable, with numerous accessories and technically suited to the requirements of the work they are designed for, Petzl harnesses set the standard in terms of safety and efficiency for workers at height.

Glass roof cleaning, Luxembourg © 2023 Petzl Distribution - Vuedici.org - VOLTIGE BENELUX - Banque européenne d'investissement

To give each user the best possible fit, Petzl harnesses are adjustable at the waist, shoulders, and leg loops. They are equipped with different types of buckles:

FAST buckles

FAST buckles are fastened and unfastened quickly and easily without loss of adjustment, even when wearing gloves.

Self-locking buckles

These buckles do not require re-threading to be locked: they adjust easily in seconds.

General Purpose Harnesses

Fall-Arrest Harnesses

Fall-arrest harnesses with a simple, lightweight design.

Fall-Arrest and Work-Positioning Harnesses

Fall-arrest and work-positioning harnesses that are comfortable and easily donned.

Harnesses for Fall Arrest, Work Positioning, and Suspension

Versatile and very comfortable harnesses for fall arrest, work positioning, and suspension.

Specialized Harnesses

Rope Access Harnesses

Very comfortable harnesses, with integrated ventral rope clamp to facilitate ascending a rope.

Tree Care Harnesses

Very comfortable harnesses, with attachment bridge for greater freedom of movement in the trees.

Rescue Harnesses

Lightweight harnesses suitable for various rescue environments.

Evacuation Triangles and Litter

Equipment designed for rope rescue (such as in confined spaces or on cable lifts).

Fall-Arrest Harnesses European Version

Certified to European and Russian standards, these harnesses are designed specifically for fall arrest. More specifically, they allow for the attachment of ABSORBICA energy-absorbing lanyards or an ASAP or ASAP LOCK mobile fall arrester.

• Lightweight, ergonomic design

NEWTON harnesses are designed to avoid interfering with the movement of the worker. The anatomical and lightweight design is close-fitting yet allows optimal freedom of movement.

How to put on the NEWTON harness

• Easy to use

Easy to fasten and unfasten harness

The FAST LT PLUS sternal buckle allows the harness to be quickly and easily fastened and unfastened without loss of adjustment, even with gloves. The buckle's locking system limits the risk of accidental unfastening.

Ready access to tools

The equipment loops simplify tool organization, and the slots allow a TOOLBAG pouch to be added.

• Versatile

Textile sternal attachment point

Lightweight and abrasion-resistant, the textile sternal attachment point allows attachment of a fall-arrest system.

Metal dorsal attachment point

Made of anodized aluminum for high strength, the dorsal attachment point allows attachment of a fall-arrest system.

• Great simplicity

NEWTON harnesses have color-coded (yellow/black) straps allowing rapid identification of the upper and lower parts of the harness before donning.

• Quick donning

Equipped with padded shoulder straps and FAST LT buckles on the leg loops, the NEWTON FAST harness dons very easily with both feet on the ground, without loss of adjustment.

• Optimal comfort

The NEWTON EASYFIT harness is designed to keep its shape, and includes two pockets for stowing small items. The leg loops are padded and equipped with FAST LT buckles, enabling the harness to be easily donned while keeping both feet on the ground, without loss of adjustment.

▶ NEWTON Harnesses

NEWTON European Version

Fall-arrest harness

NEWTON is a lightweight, ergonomic fall-arrest harness. It is easy to use and its straps are color-coded to make donning easier. The harness allows immediate access to tools, with equipment loops and slots for the TOOLBAG pouch. Its textile sternal attachment point and metal dorsal attachment point provide tremendous versatility. It is certified to European and Russian standards.

NEWTON FAST European Version

Quick-donning fall-arrest harness

NEWTON FAST is a lightweight, ergonomic fall-arrest harness that can be quickly donned. It is equipped with padded shoulder straps and FAST LT buckles on the leg loops, allowing the harness to be donned with both feet on the ground, without loss of adjustment. The harness allows immediate access to tools, with equipment loops and slots for the TOOLBAG pouch. Its textile sternal attachment point and metal dorsal attachment point provide tremendous versatility. It is certified to European and Russian standards.

NEWTON EASYFIT European Version

Comfortable and quick-donning fall-arrest harness

NEWTON EASYFIT is a comfortable, ergonomic fall-arrest harness that can be quickly donned. It is equipped with padded shoulder straps and FAST LT buckles on the leg loops, allowing the harness to be donned with both feet on the ground, without loss of adjustment. Its lightweight, breathable design offers two zippered pockets for storing small items. The harness allows immediate access to tools, with equipment loops and slots for the TOOLBAG pouch. Its textile sternal attachment point and metal dorsal attachment point provide tremendous versatility. It is certified to European and Russian standards.

Accessories

HI-VIZ Vest for NEWTON Harnesses

Fluorescent-colored vest with reflective strips makes the worker highly visible in a variety of lighting conditions. It installs quickly and easily on NEWTON, NEWTON FAST, and NEWTON EASYFIT harnesses. The sternal buckle, multiple attachment points, and lanyard connector parking all remain accessible during use for optimal freedom of movement.

Leg Loop Padding for NEWTON Harnesses

Leg loop padding that can be added to NEWTON and NEWTON FAST harnesses to increase comfort, or used as replacement padding on NEWTON EASYFIT harnesses.

Fall-Arrest Harnesses International Version

Certified to North American, European, and Russian standards, these harnesses are designed specifically for fall arrest. More specifically, they allow for the attachment of ABSORBICA energy-absorbing lanyards or an ASAP or ASAP LOCK mobile fall arrester.

• Lightweight, ergonomic design

NEWTON harnesses are designed to avoid interfering with the movement of the worker. The anatomical and lightweight design is close-fitting yet allows optimal freedom of movement.

 How to put on the NEWTON harness

• Easy to use

Easy to fasten and unfasten harness

The FAST LT PLUS sternal buckle allows the harness to be quickly and easily fastened and unfastened without loss of adjustment, even with gloves. The buckle's locking system limits the risk of accidental unfastening.

Lanyard connector parking

The harnesses have a parking system for fall-arrest lanyard connectors on each shoulder strap. In the event of a fall, the system releases the MGO connector and allows the absorber to be deployed.

• Versatile

The harnesses have a metal dorsal attachment point that allows attachment of a fall-arrest system, and a textile dorsal attachment point that allows attachment of a self-retracting fall-arrest system.

• Easy harness inspection

The sternal and dorsal attachment points are equipped with visual indicators: a red tag appears after a fall to indicate that the harness must be retired.

• Great simplicity

NEWTON harnesses have color-coded (yellow/black) straps allowing rapid identification of the upper and lower parts of the harness before donning.

• Quick donning

Equipped with padded shoulder straps and FAST LT PLUS buckles on the leg loops, the NEWTON FAST harness dons very easily with both feet on the ground, without loss of adjustment.

• Optimal comfort

The NEWTON EASYFIT harness is designed to keep its shape, and includes two pockets for stowing small items. The leg loops are padded and equipped with FAST LT PLUS buckles, enabling the harness to be easily donned while keeping both feet on the ground, without loss of adjustment.

Accessories

HI-VIZ Vest for NEWTON Harnesses

Fluorescent-colored vest with reflective strips makes the worker highly visible in a variety of lighting conditions. It installs quickly and easily on NEWTON, NEWTON FAST, and NEWTON EASYFIT harnesses. The sternal buckle, multiple attachment points, and lanyard connector parking all remain accessible during use for optimal freedom of movement.

Leg Loop Padding for NEWTON Harnesses

Leg loop padding that can be added to NEWTON and NEWTON FAST harnesses to increase comfort, or used as replacement padding on NEWTON EASYFIT harnesses.

Fall-Arrest and Work-Positioning Harnesses

These harnesses help provide fall protection for the worker and enable them to position themselves at a workstation, with a GRILLON lanyard, for example. Additionally, they are specifically designed to facilitate vertical progression on a rail or cable (European versions only).

• Quick and easy donning

VOLT and VOLT WIND harnesses are very quick to don. The waistbelt and leg loops are equipped with FAST LT PLUS/FAST LT buckles, allowing the harness to be easily donned while keeping both feet on the ground.

• Optimal comfort

Comfortable work positioning

The wide, semi-rigid waistbelt and leg loops provide excellent support. The lightweight, breathable construction maximizes air flow.

Ventral attachment point suitable for vertical progression on a rail or cable

The LADDER CLIMB attachment point allows for ventral attachment of the fall-arrest trolley, which distributes the load on the waistbelt, providing optimal comfort. In the event of a fall, the attachment point automatically moves upward to a sternal position to help keep the body in a vertical post-fall position (only on European versions).

Folding side attachment points

Side attachment points can be folded down to prevent them snagging accidentally when not in use.

• Easy to use

The harnesses have a parking system for the MGO connectors on fall-arrest lanyards on each shoulder strap. In the event of a fall, the system releases the MGO connectors and allows the absorber to be deployed.

• For work on towers and antennas

VOLT harnesses have a wide waistbelt with equipment loops on the back for easy organization of work tools.

• For work inside wind turbine towers

VOLT WIND harnesses have dorsal wear protectors to reduce wear on the straps when moving about inside a wind turbine tower.

VOLT harnesses

VOLT® European version

Fall-arrest and work-positioning harness with attachment point for vertical progression on rail or cable

The VOLT fall-arrest and work-positioning harness is very quick to don, thanks to the FAST LT PLUS and FAST LT buckles that allow it to be donned with both feet on the ground. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. Its LADDER CLIMB attachment point allows for ventral attachment of the fall-arrest trolley, providing optimal comfort during progression. It is certified to European and Russian standards.

VOLT® International Version

Fall-arrest and work-positioning harness

The VOLT fall-arrest and work-positioning harness is very quick to don, thanks to the FAST LT PLUS buckles that allow it to be donned with both feet on the ground. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. It features a textile dorsal attachment point designed for connecting a self-retracting fall-arrest system. It is certified to North American and European standards.

VOLT WIND harnesses

VOLT® WIND European Version

Fall-arrest and work-positioning harness for the wind power industry with attachment point for vertical progression on rail or cable

The VOLT WIND fall-arrest and work-positioning harness is very quick to don, thanks to the FAST LT PLUS and FAST LT buckles that allow it to be donned with both feet on the ground. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. Its LADDER CLIMB attachment point allows for ventral attachment of the fall-arrest trolley, providing optimal comfort during progression. It has wear protectors on the waistbelt and dorsal point to limit wear when moving about inside the wind turbine tower. It is certified to European and Russian standards.

VOLT® WIND International Version

Fall-arrest and work-positioning harness for the wind power industry

The VOLT WIND fall-arrest and work-positioning harness is very quick to put on, thanks to the FAST LT PLUS buckles that allow it to be donned with both feet on the ground. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. It features a textile dorsal attachment point designed for connecting a self-retracting fall-arrest system. It has wear protectors on the waistbelt and dorsal point to limit wear when moving about inside the wind turbine tower. It is certified to North American and European standards.

Accessory

How to install the VOLT seat

Seat for VOLT® Harnesses

Seat for VOLT harnesses for greater comfort while suspended

The seat for the VOLT harness attaches to the designated slots on the harness. It provides additional comfort during prolonged suspension.

Harnesses for Fall Arrest, Work Positioning, and Suspension

These harnesses are used for fall protection, for positioning at a workstation, and for working comfortably while suspended.

- **Comfortable construction**

The wide, semi-rigid waistbelt and leg loops provide excellent support. The lightweight, breathable construction maximizes air flow.

- **Convenient buckle system**

- **Easy to adjust**

The AVAO harnesses can be adjusted at the waistbelt and shoulder straps. These adjustment points are equipped with self-locking DOUBLEBACK buckles. These do not require re-threading to be locked: the harness adjusts easily in seconds.

- **Available in easier donning version**

The leg loops of AVAO harnesses are equipped with FAST / FAST LT buckles that facilitate donning the harness with both feet on the ground or with large footwear, without loss of adjustment, even when wearing gloves.

- **Efficiently organize work tools**

AVAO harnesses are equipped with six equipment loops on the sides and at the rear of the waistbelt. They are shaped to facilitate clipping carabiners. Each harness also has slots designed for the CARITool tool holder and the TOOLBAG tool pouch.

- **Lanyard connector parking**

The harnesses have a parking system for fall-arrest lanyard connectors on each shoulder strap. In the event of a fall, the system releases the MGO connector and allows the absorber to be deployed.

- **A complete solution, with dorsal attachment point**

The AVAO BOD and AVAO BOD FAST full-body harnesses are equipped with a dorsal attachment point for connecting a fall-arrest system. In the event of a fall on this attachment point, a shorter adjustment of the length between the waistbelt and the leg loops means the load is taken up on the leg loops, allowing the user to remain suspended longer while awaiting rescue.

- **A lightweight and modular solution**

Combining a sit harness with a separate chest harness is a more lightweight solution if the user does not need a dorsal attachment point. It is also a solution for hard-to-fit body types, as it allows users to combine different seat and chest harness sizes.

AVAO® BOD / AVAO® BOD FAST European Version

Comfortable harness for fall arrest, work positioning, and suspension

The AVAO BOD fall-arrest, work-positioning, and suspension harness is designed for greater comfort in a variety of different situations. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. The shoulder straps have a system for stowing the fall-arrest lanyard connectors and keeping them within reach. The DOUBLEBACK self-locking buckles at the rear of the harness, between the waistbelt and the leg loops, allow for a shorter adjustment when the dorsal attachment point is used. The harness also makes it easier to carry and organize work tools, with multiple gear loops and slots for attaching CARITool tool holders and TOOLBAG tool pouches. The harness is fastened with a SCREW-LOCK manual locking carabiner and is certified to European and Russian standards. AVAO BOD features leg loops with DOUBLEBACK self-locking buckles; AVAO BOD FAST has leg loops with FAST LT buckles.

AVAO® BOD / AVAO® BOD FAST International Version

Comfortable harness for fall arrest, work positioning, and suspension

The AVAO BOD fall-arrest, work-positioning, and suspension harness is designed for greater comfort in a variety of different situations. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. The shoulder straps have a system for stowing the fall-arrest lanyard connectors and keeping them within reach. The DOUBLEBACK self-locking buckles at the rear of the harness, between the waistbelt and the leg loops, allow for a shorter adjustment when the dorsal attachment point is used. The harness also makes it easier to carry and organize work tools, with multiple gear loops and slots for attaching CARITool tool holders and TOOLBAG tool pouches. The harness has an integrated fall indicator on the dorsal attachment point and is fastened with a TRIACT-LOCK automatic locking carabiner. It is certified to North American and European standards. AVAO BOD features leg loops with DOUBLEBACK self-locking buckles; AVAO BOD FAST has leg loops with FAST buckles.

TOP

Chest harness for sit harness

The TOP chest harness transforms AVAO SIT, AVAO SIT FAST, FALCON, FALCON MOUNTAIN, and SEQUOIA SRT sit harnesses into fall-arrest harnesses. The padded shoulder straps are widely spaced to reduce neck chafing. When the waistbelt is loaded, the straps help distribute the load over the shoulders. They also have a system for stowing the fall-arrest lanyard connectors and keeping them within reach.

AVAO® SIT / AVAO® SIT FAST

Comfortable sit harness for work positioning and suspension

The AVAO SIT work positioning and suspension sit harness is designed for greater comfort in a variety of situations. The wide, semi-rigid waistbelt and leg loops provide excellent support. Its lightweight, breathable construction maximizes air flow. The harness also makes it easier to carry and organize work tools, with multiple gear loops and slots for attaching CARITool tool holders and TOOLBAG tool pouches. This sit harness is designed to be converted into a fall-arrest harness when combined with a TOP chest harness, or into a rope access harness when combined with a TOP CROLL S or L chest harness. The AVAO SIT leg loops have DOUBLEBACK self-locking buckles; AVAO SIT FAST leg loops have FAST LT buckles.

Rope Access Harnesses

Designed for rope access, these harnesses allow the worker to be protected in the event of a fall and to position themselves at the workstation. The gated ventral attachment point facilitates rope ascents and makes working while suspended more comfortable.

• Efficiently integrate equipment

The gated attachment point allows the user to connect:

- CROLL ventral rope clamp on the ventral point for greater efficiency on rope ascents
- PROGRESS lanyard directly on the ventral attachment point
- PODIUM seat on the axle of the attachment point, allowing the load to be supported directly by the descender, while offering mobility at the ventral attachment point

• Efficiently organize work tools

ASTRO harnesses are equipped with six equipment loops on the sides and at the rear of the waistbelt. They are shaped to facilitate clipping carabiners. Each harness also has slots designed for the CARITOOL tool holder and the TOOLBAG tool pouch.

• Ultra-comfortable design

The waistbelt and the leg loops of ASTRO harnesses are semi-rigid and wide in order to limit pressure points and provide effective support. These two zones are sculpted and lined with breathable foam padding for optimal comfort while suspended, and for good ventilation. This construction also facilitates harness donning.

• Convenient buckle system

Easy to don

The leg loops of ASTRO harnesses are equipped with FAST / FAST LT buckles that facilitate donning the harness with both feet on the ground or with large footwear, without loss of adjustment, even when wearing gloves.

Easy to adjust

The waistbelt and shoulder straps are equipped with self-locking DOUBLEBACK / DOUBLEBACK PLUS buckles for quick and easy adjustment.

• A complete solution, with dorsal attachment point

ASTRO BOD FAST full-body harnesses are equipped with a dorsal attachment point for attaching a fall-arrest system. In the event of a fall on this attachment point, a shorter adjustment of the length between the waistbelt and the leg loops means the load is taken up on the leg loops, allowing the user to remain suspended longer while awaiting rescue.

• A lightweight and modular solution

Combining a sit harness with a separate chest harness is a more lightweight solution if the user does not need a dorsal attachment point. It is also a solution for hard-to-fit body types, as it allows users to combine different seat and chest harness sizes.

ASTRO harnesses

ASTRO® BOD FAST European Version

Ultra-comfortable rope access harness

With an integrated CROLL L ventral rope clamp, the ASTRO BOD FAST harness is designed for greater efficiency and comfort during rope ascents. The gated ventral attachment point allows you to efficiently integrate equipment (such as rope clamp, lanyard, or seat). The wide, semi-rigid waistbelt and leg loops provide excellent support. They are contoured and lined with breathable foam padding for comfort while suspended. The DOUBLEBACK self-locking buckles at the rear of the harness, between the waistbelt and the leg loops, allow for a shorter adjustment when the dorsal attachment point is used. The harness also makes it easier to carry and organize work tools, with multiple gear loops and slots for attaching CARITool tool holders and TOOLBAG tool pouches. It is certified to European and Russian standards. The ASTRO BOD FAST (European version) features leg loops with FAST LT buckles.

ASTRO® BOD FAST International Version

Ultra-comfortable rope access harness

With an integrated CROLL L ventral rope clamp, the ASTRO BOD FAST harness is designed for greater efficiency and comfort during rope ascents. The gated ventral attachment point allows you to efficiently integrate equipment (such as rope clamp or seat). The wide, semi-rigid waistbelt and leg loops provide excellent support. They are contoured and lined with breathable foam padding for comfort while suspended. The DOUBLEBACK self-locking buckles at the rear of the harness, between the waistbelt and the leg loops, allow for a shorter adjustment when the dorsal attachment point is used. The harness also makes it easier to carry and organize work tools, with multiple gear loops and slots for attaching CARITool tool holders and TOOLBAG tool pouches. It has a fall indicator on the dorsal attachment point and is certified to North American and European standards. ASTRO BOD FAST (international version) features leg loops with FAST buckles.

TOP CROLL® S

Chest harness for sit harness, with integrated CROLL S ventral rope clamp

The TOP CROLL S integrates a CROLL S ventral rope clamp to transform ASTRO SIT FAST, AVAO SIT, AVAO SIT FAST, FALCON, FALCON ASCENT, and SEQUOIA SRT harnesses into rope access harnesses. The textile sternal attachment point optimally reduces weight and bulk. The padded shoulder straps are widely spaced to reduce neck chafing. When the waistbelt is loaded, the straps help distribute the load over the shoulders. The rear connections on each side of the waistbelt offer excellent stability.

TOP CROLL® L

Chest harness for sit harness, with integrated CROLL L ventral rope clamp

The TOP CROLL L integrates a CROLL L ventral rope clamp to transform ASTRO SIT FAST, AVAO SIT, AVAO SIT FAST, FALCON, FALCON ASCENT and SEQUOIA SRT harnesses into rope access harnesses. The padded shoulder straps are widely spaced to reduce neck chafing. When the waistbelt is loaded, the straps help distribute the load over the shoulders.

ASTRO® SIT FAST

Ultra-comfortable sit harness for rope access

The ASTRO SIT FAST rope access sit harness features a gated ventral attachment point that allows you to efficiently integrate equipment (such as rope clamp, lanyard, or seat). The wide, semi-rigid waistbelt and leg loops provide excellent support. They are contoured and lined with breathable foam padding for comfort while suspended. The harness also makes it easier to carry and organize work tools, with multiple gear loops and slots for attaching CARITool tool holders and TOOLBAG tool pouches. This sit harness is designed to be converted into a full-body harness when combined with a TOP CROLL S or L chest harness. The ASTRO SIT FAST features leg loops with FAST LT buckles.

Accessory

PODIUM

Seat for prolonged suspension

The PODIUM provides optimal comfort during prolonged suspension. The wide seat offers excellent stability. Rigid sides prevent the webbing straps from cutting into the thighs. The easy-to-use seat has two gear loops and a rear hook, making it easier to store in order to facilitate movement. It connects to ASTRO BOD FAST and ASTRO SIT FAST harnesses with two shackles (find a description of the shackles on page 43).

Tree Care Harnesses

These harnesses are designed for arborists: they allow great mobility in the tree and optimally distribute the load between the waistbelt and the leg loops. They also provide excellent lumbar support in the many work phases where the arborist has their weight on the harness.

• Comfortable

The semi-rigid, extra-wide waistbelt provides excellent support for the user. It is also sculpted and lined with foam padding for improved comfort while suspended.

• Ergonomic

Gated attachment points

The gated attachment points facilitate connection of a ZILLON or MICROFLIP lanyard. They also allow installation of several attachment bridges (adjustable or fixed), as well as accessories like RING attachment rings or SWIVELS, directly on the attachment bridge.

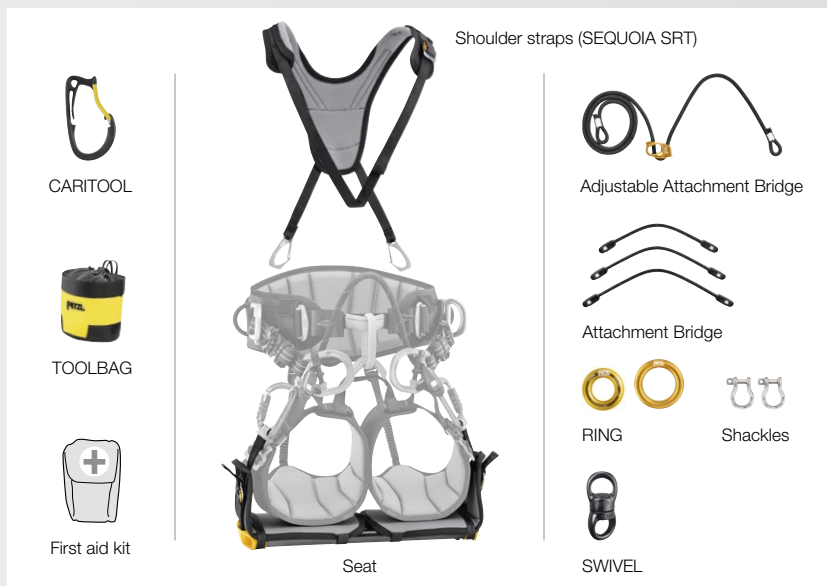

Easy to don

The leg loops of SEQUOIA harnesses are equipped with FAST LT PLUS buckles that facilitate donning the harness with both feet on the ground or with large footwear, without loss of adjustment, even when wearing gloves.

• Accessories

Accessories for the SEQUOIA line of harnesses allow each user to adapt the equipment to their needs.

• For single rope ascent techniques

The SEQUOIA SRT features a ventral attachment point for installing a ZIGZAG mechanical Prusik with the CHICANE and KNEE ASCENT accessories.

• For doubled rope ascent techniques

The SEQUOIA harness waistbelt is equipped with a FAST buckle for quick and simple fastening and unfastening without loss of adjustment, even while wearing gloves.

▶ SEQUOIA SRT harnesses

SEQUOIA® SRT

Tree care sit harness for single-rope ascent techniques

The SEQUOIA SRT is a tree care sit harness for single rope ascent techniques. It has a ventral attachment point that allows a ZIGZAG or ZIGZAG PLUS mechanical Prusik to be installed with CHICANE and KNEE ASCENT accessories. The extra-wide, semi-rigid waistbelt and leg loops provide comfort for the arborist. It is equipped with DOUBLEBACK PLUS self-locking buckles on the waistbelt and FAST LT PLUS buckles on the leg loops. The gated attachment points allow the user to easily connect a ZILLON or MICROFLIP lanyard, or to install several attachment bridges and accessories directly on the bridge. The harness also makes it easy to carry and organize work tools, with multiple equipment loops and slots for attaching CARITOOL tool holders.

SEQUOIA®

Tree care sit harness for doubled rope ascent techniques

The SEQUOIA is a tree care sit harness for doubled rope ascent techniques. The extra-wide, semi-rigid waistbelt and leg loops provide comfort for the arborist. The waistbelt is equipped with a FAST buckle for quick and easy fastening and unfastening without loss of adjustment, even while wearing gloves. The leg loops have FAST LT PLUS buckles. The gated attachment points allow the user to easily connect a ZILLON or MICROFLIP lanyard, or to install several attachment bridges and accessories directly on the bridge. The harness also makes it easy to carry and organize work tools, with multiple equipment loops and slots for attaching CARITOOL tool holders.

Accessories

Shoulder Straps (Only for SEQUOIA® SRT)

Shoulder straps for SEQUOIA SRT sit harness designed for taking the load from the waistbelt and redistributing it to the shoulders for improved comfort. They connect to the ventral attachment point of the harness and to the two slots at the rear of the waistbelt.

Seat

Wide seat for a comfortable working position while suspended. The width is adjustable, reducing bulk and making it easier to move within the tree. It connects to the two gated points on the SEQUOIA and SEQUOIA SRT arborist sit harnesses, using the two shackles.

Adjustable Attachment Bridge

Adjustable attachment bridge for SEQUOIA and SEQUOIA SRT harnesses allows quick and precise adjustment of the position of progression tools installed on the bridge.

Attachment Bridge

Attachment bridge for connection to the two gated attachment points of the SEQUOIA and SEQUOIA SRT arborist sit harnesses, to optimize lateral mobility.

RING

The RING connection ring can be used to create multiple anchors or be installed directly onto the SEQUOIA and SEQUOIA SRT harnesses' attachment bridges to improve the arborist's lateral mobility.

Shackles

Shackles for connecting a seat. Find a description of the shackles on page 43.

Rescue Harnesses

Designed for rescuers, these harnesses are lightweight for increased mobility and rapid movement during operations. Having the choice between several different models allows you to choose the best fit for different environments that may be encountered in the field.

- **Comfortable, lightweight design**

Comfortable, lightweight design

The semi-rigid and slim waistbelt and leg loops with 3D foam padding provide the range of FALCON harnesses with an optimal comfort-to-weight ratio to limit bulk.

Compact side attachment points

The textile side attachment points on harnesses in the FALCON range are designed for occasional use and limit bulk and weight.

- **Ergonomic**

Easy to adjust

The FALCON and FALCON ASCENT harnesses feature DOUBLEBACK PLUS self-locking buckles on the waistbelt and FAST LT buckles on the leg loops, making them quick and easy to put on and adjust.

- **Efficiently organize equipment and work tools**

Equipment loops and slots

The range of FALCON harnesses feature equipment loops on the sides and at the rear of the waistbelt. Each harness also has slots designed for the CARITOOOL tool holder and the TOOLBAG tool pouch.

- **For working while suspended**

The metal ventral attachment point on the FALCON harness distributes the load between the waistbelt and the leg loops while suspended.

- **For efficiency when ascending a rope**

The two-part ventral attachment point of the FALCON ASCENT harness increases the efficiency of rope ascents when using a CROLL ventral rope clamp.

- **For operations using climbing techniques**

The textile bridge construction of the FALCON MOUNTAIN harness favors progression with climbing techniques and makes it comfortable to walk in.

▶ FALCON harnesses

FALCON

Lightweight sit harness for suspended rescue

FALCON is a lightweight sit harness designed for rescue operations involving suspension. The metal ventral attachment point distributes the load between the waistbelt and leg loops. The design is lightweight and comfortable, joining the slim, semi-rigid waistbelt and leg loops with 3D foam padding. It provides optimal balance between low weight and comfort, as well as reduced bulk, when you're standing, moving, or hanging. The DOUBLEBACK PLUS self-locking buckles on the waistbelt and the FAST LT buckles on the leg loops make it quick and easy to put on and adjust. The rear loop allows a TOP or TOP CROLL L chest harness to be attached.

FALCON ASCENT

Lightweight and comfortable sit harness for rescue operations and work involving rope ascent

FALCON ASCENT is a lightweight sit harness designed for rescue operations and work involving rope ascent. The two-part ventral attachment point fastens with an OMNI carabiner and provides greater efficiency when ascending a rope. The design is lightweight and comfortable, joining the slim, semi-rigid waistbelt and leg loops with 3D foam padding, which provides optimal balance between low weight and comfort, as well as reduced bulk. The DOUBLEBACK PLUS self-locking buckles on the waistbelt and the FAST LT buckles on the leg loops make it quick and easy to put on and adjust. The rear loop allows a TOP CROLL L chest harness to be attached.

FALCON MOUNTAIN

Ultra-lightweight and comfortable sit harness for rescue operations that involve climbing techniques

FALCON MOUNTAIN is an ultra-lightweight sit harness designed for rescue operations that involve climbing techniques. Its ventral attachment point has a textile bridge for mobility when progressing and comfort when walking. The design is very lightweight and comfortable, joining the slim, semi-rigid waistbelt and leg loops with 3D foam padding, which provides an optimal balance between low weight and comfort, as well as reduced bulk. The DOUBLEBACK self-locking buckles on the waistbelt and leg loops make it quick and easy to put on and adjust. The rear plastic loop allows a TOP or TOP CROLL L chest harness to be attached.

Accessory

CHEST'AIR

Chest harness for sit harnesses

The CHEST'AIR chest harness transforms the FALCON, FALCON MOUNTAIN, AVAO SIT, and SEQUOIA SRT sit harnesses into fall-arrest harnesses. With multiple certifications, CHEST'AIR can be attached to a climbing or mountaineering harness to keep a victim upright during a rescue. It simply connects to the ventral attachment point of the sit harness and fastens via the FAST LT buckle at the chest, for quick donning. It adapts easily to different body types with its DOUBLEBACK PLUS self-locking buckles on the shoulder straps and ventral strap. Made with 3D foam padding, the CHEST'AIR chest harness provides additional comfort while hanging.

Evacuation Triangles and Litter

Evacuation Triangles

Evacuation triangles are mainly used for rescue on cable lifts and by firefighters. They allow unequipped people to be evacuated in minimal time.

THALES

Safety chest collar and comfortable evacuation triangle with shoulder straps

The THALES safety chest collar and evacuation triangle is designed for rescue operations, cable lift evacuations, and helicopter evacuations. The chest collar configuration allows the evacuee to be secured in an emergency and then evacuated with the triangle. Passing from the chest collar configuration to the triangle configuration is quick with the use of three hook and loop straps. The ergonomic shape of the seat and the presence of shoulder straps makes suspension more comfortable than with a classic evacuation triangle. Color-coding differentiates the back and seat, as well as the different straps and closure system, making it easier to put on the evacuee. The high-strength TPU tarp material allows regular to intensive use.

PITAGOR

Comfortable evacuation triangle with shoulder straps

The PITAGOR evacuation triangle is designed for rescue operations and cable lift evacuations. The ergonomic shape of the seat and the presence of shoulder straps makes suspension more comfortable than with a classic evacuation triangle. Color-coding differentiates the back and seat, as well as the closure system, making it easier to put on the evacuee. The high-strength TPU tarp material allows regular to intensive use.

Rescue Litter

STEF

Tilting device for NEST litter

The STEF tilting device joins the three connection points of the NEST litter and allows it to be easily tilted according to the terrain. It has three Am'D TRIACT-LOCK connectors for automatic locking of the connection points, and a swivel for precise orientation of the litter.

NEST

Litter for confined spaces

The NEST litter was developed in partnership with the French national caving rescue organization. It allows a victim to be transported horizontally, vertically, or at an angle. It handles easily and simplifies loading the victim. It is suitable for technical rope rescue, particularly in confined spaces.

Bag for NEST Litter

The bag for the NEST litter allows it to be transported and stored. The openings at either end allow the handles of the litter to protrude, for easier handling. It is equipped with three handles and a bandolier system for easier transport.

RING2RING

Rigid double ring for sit harnesses with textile bridges

Specifically designed to be used on sit harnesses with textile bridges, the RING2RING accessory is primarily for use during helicopter rescue. It functions as a second attachment ring in addition to the textile loop, allowing the rescuer to better organize their equipment at the ventral attachment point and making it easier for the winch operator to access the connection point when connecting the rescuer.

RING2SIDE

Accessory that allows you to convert a textile lateral attachment point into a metal attachment point

The RING2SIDE accessory allows you to convert a textile lateral attachment point into a metal attachment point on the FALCON and FALCON ASCENT harnesses. Its large ring and intuitive clipping orientation makes it easier to attach equipment. It can also be folded down to avoid being snagged when not in use.

LIFT

Spreader for harnesses

Spreader for full-body harnesses or sit harnesses used in conjunction with a chest harness, allowing upright descent (for confined spaces).

Installing and uninstalling the CARITOOOL

CARITOOOL

Harness tool holder

The CARITOOOL tool holder provides one-handed tool access and storage. The stabilizing clip allows it to slip onto the harness straps and stay in place. The gate has a protective feature that limits accidental snagging. It is available in two sizes.

RING OPEN

Multidirectional gated ring

See page 58 for details on the RING OPEN gated ring.

Shackles

Shackles for connecting a seat. Connects to the gated attachment point on a harness, allowing you to efficiently integrate equipment.

Lanyard Connector Parking

Lanyard connector parking accessory (pack of 2)

Lanyard connector parking accessories install on the shoulder straps of VOLT, VOLT WIND, AVAO BOD, AVAO BOD FAST, and ASTRO BOD FAST harnesses and TOP, TOP CROLL S, and TOP CROLL L chest harnesses. They allow the MGO connectors on fall-arrest lanyards to be stowed on each shoulder strap, keeping the connectors within reach and the lanyard out of the user's way. In the event of a fall, the system releases the MGO connectors and allows the absorber to be deployed.

PORTO

Webbing equipment loop

Webbing equipment loop that attaches to a pack's internal loop for organizing equipment.

BOLTBAG

Equipment pouch

Equipment pouch for organizing a hammer, bolting gear, and other equipment. It has two pockets and exterior holster.

Harness Accessories

Petzl offers a complete solution that secures equipment when working at height to help prevent tools from being dropped. These products were designed in accordance to the ANSI/ISEA 121-2018 standard for dropped object prevention solutions.

Petzl Dropped Tool Prevention Solution

- TOOLINK S & TOOLTAPE for tools up to 2.3 kg

- TOOLINK M for tools up to 3 kg

- TOOLINK L for tools up to 5 kg

TOOLBAG

Tool pouch

The TOOLBAG tool pouch allows you to store small tools and fasteners. The opening and closure system is easy to use with one hand. It can be connected to the harness using the INTERFAST accessory, reducing bulk on the harness and making the pouch more accessible. It is durably constructed and can be used on a daily basis without worrying about wear. It is available in three sizes: 1.5, 3, and 6 liters.

INTERFAST

Quick connection accessory for the TOOLBAG and TOOLEASH

INTERFAST is an accessory that allows you to connect a TOOLBAG tool pouch and a TOOLEASH drop-prevention tether. It is versatile and compatible with any harness that has slots. The design is compact and durable to limit bulk on the harness and keep all the attached elements secure when working at height.

TOOLEASH

Extendable drop-prevention tether for tools weighing up to 5 kg

The TOOLEASH extendable tether allows you to attach a tool to prevent dropping it when working at height. The high-strength elasticized tether is compact on your harness. The versatile connection system allows the user to make a long-term tool tether or switch between tools, depending on need. TOOLEASH is part of a complete solution for dropped tool prevention.

x5

TOOLINK S and TOOLTAPE

Attachment for a tool weighing up to 2.3 kg (pack of 5 TOOLINK S tether and a TOOLTAPE adhesive)

TOOLINK S is an attachment that allows you to connect and secure a tool with no connection hole and a smooth, straight handle when working at height. It can be installed on a tool weighing up to 2.3 kg using TOOLTAPE adhesive. The ergonomic connection point allows you to quickly clip and unclip, so it's easy to use.

x5

TOOLINK M

Attachment for a tool weighing up to 3 kg with a connection hole (pack of 5)

TOOLINK M is an attachment that allows you to connect and secure a tool weighing up to 3 kg with an integrated connection hole when working at height. The ergonomic connection point allows you to quickly clip and unclip, so it's easy to use.

x5

TOOLINK L

Attachment for a tool weighing up to 5 kg (pack of 5)

TOOLINK L is an attachment that allows you to connect and secure a heavier tool weighing up to 5 kg when working at height. The ergonomic connection point allows you to quickly clip and unclip, so it's easy to use.

MINO

Non-PPE accessory carabiner

This product is not PPE (Personal Protective Equipment). Find a description of the MINO on page 82.

LANYARDS AND ENERGY ABSORBERS

Whether for work positioning or to have an energy absorber that limits the force transmitted to the user in the event of a fall, Petzl offers a complete line of lanyards for different applications.

Glass roof cleaning, Luxembourg © 2023 Petzl Distribution - Vuedici.org - VOLTIGE BENELUX - Banque européenne d'investissement

Depending on the model, the ends of Petzl lanyards are equipped with plastic sheaths or with a STRING. These items help keep the connector positioned on the major axis and make it easier to clip. They also protect the ends from abrasion due to repeated rubbing.

Plastic sheath

STRING

General Purpose Lanyards

Work-Positioning Lanyards

Adjustable lanyards with ergonomic handle allow comfortable positioning at a workstation.

Fall-Arrest Lanyards

Lanyards with an energy absorber, used when there is a fall hazard. Petzl offers three types of lanyards with an absorber:

- Single (ABSORBICA-I) or double (ABSORBICA-Y) lanyards with an energy absorber
- Lanyards that can be combined with an ABSORBICA energy absorber to create a single or double energy-absorbing lanyard with a maximum length of two meters

Specialized Lanyards

Progression Lanyards for Rope Access

Fixed or adjustable lanyards, for many different types of progression. Available in single and double versions.

Positioning Lanyard for Rope Access

Adjustable lanyard with rope adjuster, for positioning at a workstation.

Tree Care Lanyards

Adjustable positioning lanyards that allow comfortable positioning for tree care work.

Helivac Lanyards

Lanyards for helicopter drop-off and recovery.

Work-Positioning Lanyards

Positioning lanyards allow the user to position themselves precisely at a workstation, with feet supported on the structure. They can adapt to different anchoring configurations.

• Versatile

Double mode use

The GRILLON lanyard can be used in double mode (on the harness side attachment points) when the user works with weight on their feet. This type of attachment provides better load distribution on the belt. The user precisely adjusts their position by pressing on the lanyard's pivoting cam.

Single mode use

When the anchor is located above the user, the GRILLON lanyard is connected to the harness ventral attachment point, so that the load is comfortably distributed between the waistbelt and leg loops. The user adjusts their position by operating the handle, while holding the free end of the lanyard.

• Easy to handle

Sewn terminations with plastic sheaths

Sewn terminations increase strength (compared to a knotted termination) while reducing bulk. These plastic sheaths protect the stitching from abrasion and facilitate handling by holding the connector in position.

• Differentiation of lanyard lengths

Lanyard length can be immediately identified by a color-coded label at the connector end.

• Petzl Custom for work-positioning lanyards

Petzl Custom allows you to choose:

- Lanyard type: Standard or high-strength rope
- Lanyard color
- Lanyard length
- Type of lanyard-end connectors and harness connector

The assembly of various components of your choice offers a ready-made solution specific to the user.

• Without connector

GRILLON lanyards are sold without connectors, so that they can be combined with different connector types, depending on the user's requirements.

• With HOOK connector

GRILLON HOOK lanyards are equipped with a HOOK auto-locking connector, ideal for connections using the harness side attachment points.

• With MGO connector

GRILLON lanyards, in combination with an MGO auto-locking connector, are ideal for connection to metal structures or to large-diameter cables and bars.

GRILLON

Adjustable lanyard for work positioning

The GRILLON adjustable lanyard is used to make work-positioning systems to complement a fall-arrest system. Its length can be very easily and precisely adjusted as necessary for comfortable positioning at the workstation. Depending on the configuration, it can be used in single or double mode. GRILLON is available in seven lengths (2, 3, 4, 5, 10, 15 and 20 m), and also in black. It is certified to North American, European, and Russian standards.

GRILLON PLUS

Adjustable work-positioning lanyard with high abrasion resistance

The GRILLON PLUS lanyard is used to make work-positioning systems, to complement a fall-arrest system. Its length can be very easily and precisely adjusted as necessary for comfortable positioning at the workstation. The aramid fiber rope provides excellent abrasion resistance. Depending on the configuration, it can be used in single or double mode. GRILLON PLUS is available in two lengths: 2 and 3 m, and is certified to North American, European, and Russian standards.

GRILLON HOOK European Version

Adjustable work-positioning lanyard with HOOK connector

The GRILLON HOOK adjustable lanyard is used to make work-positioning systems to complement a fall-arrest system. Its length can be very easily and precisely adjusted as necessary for comfortable positioning at the workstation. Its HOOK connector is ideal for using the lanyard in double mode on the harness side attachment points. The GRILLON HOOK (European version) is available in four lengths (2, 3, 4 and 5 m) and is certified to European and Russian standards.

GRILLON HOOK International Version

Adjustable work-positioning lanyard with HOOK connector

The GRILLON HOOK adjustable lanyard is used to make work-positioning systems to complement a fall-arrest system. Its length can be very easily and precisely adjusted as necessary for comfortable positioning at the workstation. Its HOOK connector is ideal for using the lanyard in double mode on the harness side attachment points. GRILLON HOOK (international version) is available in four lengths (2, 3, 4 and 5 m) and is certified to North American and European standards.

GRILLON MGO

Adjustable work-positioning lanyard with MGO connector

The GRILLON MGO lanyard is used to make work-positioning systems to complement a fall-arrest system. Its length can be very easily and precisely adjusted as necessary for comfortable positioning at the workstation. Connector with large gate opening is ideal for connection to metal structures or to large-diameter cables and bars. GRILLON MGO is available in two lengths: 2 and 3 m, and is certified to North American and European standards.

Fall-Arrest Lanyards

These lanyards are used when there is a fall hazard and they are connected to the sternal or dorsal attachment point on the harness. The integrated absorber provides energy absorption in a fall, limiting the impact force on the user.

- **Energy absorption for users who weigh between 60 and 140 kg**

In the event of a fall, the tearing of the energy absorber webbing limits the impact force on the user. The lanyards are designed for users who weigh between 60 and 140 kg. The progressive tearing of the webbing reduces the deceleration on lightweight users.

- **Compact and abrasion resistant energy absorber**

The energy absorbers are very compact to avoid hindering the user's movements or interfering with work. The durable fabric pouch helps protect the energy absorber from abrasion and potential contaminants.

- **Ready-to-use or customizable lanyards**

Ready-to-Use Lanyards

ABSORBICA-Y MGO and ABSORBICA-Y TIE-BACK MGO lanyards come with lanyard-end connectors, as well as connectors for harness attachment.

Customizable Lanyards

ABSORBICA-I (80, 150, and VARIO) and ABSORBICA-Y (80, 150, and TIE-BACK) lanyards do not come with connectors, allowing the user to customize the lanyard according to their needs and the structure they're working on.

Note: Certifications depend on the connectors that are used.

- **For progression on a lifeline without passing intermediate anchors**

ABSORBICA-I single lanyards are designed especially for protection on a horizontal lifeline or on an elevated platform.

- **For progression on a vertical structure or a lifeline and when passing intermediate anchors**

The ABSORBICA-Y lanyards with two arms allow for continuous protection by successively detaching and re-attaching the two arms.

▶ ABSORBICA-I lanyards

NEW 2024

ABSORBICA®-I 80/150

Single lanyard with integrated energy absorber

ABSORBICA-I is a single lanyard with compact energy absorber, designed for progression on a horizontal lifeline (rope or cable) or on an elevated platform, without passing intermediate anchors. It works with users who weigh between 60 and 140 kg. It has several connection options on the harness and can be used with different types of connectors. Available in two versions: 80 (rope arm) or 150 FLEX (elasticized arm).

NEW 2024

ABSORBICA®-I VARIO

Adjustable single lanyard with integrated energy absorber

ABSORBICA-I VARIO is an adjustable single lanyard with compact energy absorber designed for progression on a horizontal lifeline (rope or cable) or on an elevated platform, without passing intermediate anchors. It works with users who weigh between 60 and 140 kg. It features the VARIO adjustment system, allowing the lanyard length to be adjusted in order to reduce potential fall height.

▶ ABSORBICA-Y lanyards

NEW 2024

ABSORBICA®-Y 80/150

Double lanyard with integrated energy absorber

ABSORBICA-Y is a double lanyard with compact energy absorber, designed for progression on a vertical structure or a horizontal lifeline, and for passing intermediate anchors. It works with users who weigh between 60 and 140 kg. It has several connection options on the harness and can be used with different types of connectors. Available in two versions: 80 (rope arms) or 150 FLEX (elasticized arms).

NEW 2024

ABSORBICA®-Y MGO 80/150 European Version

Double lanyard with integrated energy absorber and MGO connectors

ABSORBICA-Y MGO is a double lanyard with compact energy absorber, designed for progression on a vertical structure or a horizontal lifeline, and when passing intermediate anchors. It works with users who weigh between 60 and 140 kg. It's ready to use, with two large-opening MGO connectors on the end of the lanyard and an OK TRIACT-LOCK connector for harness attachment. It is available in two versions: 80 (rope arms), or 150 FLEX (elasticized arms).

NEW 2024

ABSORBICA®-Y MGO 80/150 International Version

Double lanyard with integrated energy absorber and MGO connectors

ABSORBICA-Y MGO is a double lanyard with compact energy absorber, designed for progression on a vertical structure or a horizontal lifeline, and when passing intermediate anchors. It works with users who weigh between 60 and 140 kg. It's ready to use, with two large-opening MGO connectors on the end of the lanyard and a Bm'D connector for harness attachment. Available in two versions: 80 (rope arms) or 150 FLEX (elasticized arms).

NEW 2024

ABSORBICA®-Y TIE-BACK/MGO

Double lanyard with integrated intermediate tie-back rings and energy absorber

The ABSORBICA-Y TIE-BACK is a double lanyard with integrated intermediate tie-back rings and compact energy absorber. It is designed for vertical progression on very large structures and passing intermediate anchor points. It works with users who weigh between 60 and 140 kg. The TIE-BACK system allows the user to wrap structures with very large cross sections. The arms are elasticized to avoid hindering progression. It's available in two versions: without connectors, or with large-opening MGO connectors on the lanyard ends and a Bm'D connector for harness attachment.

Fall-Arrest Lanyards

Fall-Arrest Lanyards

JANE-I

Single lanyard for making a fall-arrest lanyard

JANE-I is a non-adjustable dynamic rope lanyard that can be combined with an ABSORBICA energy absorber to make a single lanyard with energy absorber. The plastic sheath helps hold the carabiner in position and facilitates clipping while protecting the termination from abrasion. It can be used to set up a temporary anchor. It is available in three lengths: 60, 100, and 150 cm.

JANE-Y for Fall-Arrest Lanyard

Double lanyard for making a fall-arrest lanyard

JANE-Y for fall-arrest lanyard is a non-adjustable dynamic rope lanyard that can be combined with an ABSORBICA energy absorber to make a double lanyard with energy absorber. The plastic sheaths help hold the carabiners in position and facilitate clipping while protecting the terminations from abrasion. It has two symmetrical ends and is available in two lengths: 60 and 100 cm.

RING OPEN

Multidirectional gated ring

See page 58 for details on the RING OPEN multidirectional gated ring.

NEW
2024

ABSORBICA®

Compact energy absorber

ABSORBICA is an energy absorber designed to be used in combination with a JANE lanyard to make a fall-arrest lanyard. Very compact, it minimizes bulk on the harness. Equipped with tear-webbing inside an openable pouch, the absorber is protected from abrasion while allowing for regular inspection.

Progression Lanyards for Rope Access

PROGRESS ADJUST-Y

Double adjustable progression lanyard

PROGRESS ADJUST-Y is a double adjustable progression lanyard that enables continuous connection for different types of progression (such as rope ascent or moving along a fixed line). Using the ADJUST rope adjuster, the length of the adjustable arm can be quickly and easily adjusted. The TANGA accessory and the plastic sheath help hold the connectors in a good position for easy clipping.

The PROGRESS ADJUST-Y lanyard allows continuous connection during all types of progression (rope ascent, moving along a traverse line...).

It adjusts quickly and precisely with the ADJUST rope adjuster, which releases with a simple turn and handles easily, thanks to its ergonomic shape.

PROGRESS ADJUST-I

Single adjustable progression lanyard

PROGRESS ADJUST-I is a single adjustable progression lanyard that, when combined with another lanyard, allows continuous connection for different types of progression (such as rope ascent or moving along a fixed line). Using the ADJUST rope adjuster, the length can be quickly and easily adjusted. Reversible, the ADJUST rope adjuster can be placed on the anchor or on the harness ventral attachment point. The CAPTIV ADJUST and STUART accessories help hold the connectors in a good position for easy clipping.

JANE-Y

Double progression lanyard

JANE-Y is a double progression lanyard that allows continuous connection during rope ascents. The plastic sheaths help hold the carabiners in position and facilitate clipping while protecting the terminations from abrasion. It has a 60 cm long arm and a 30 cm short arm.

Work-Positioning Lanyard

PROGRESS ADJUST-I

Adjustable positioning lanyard

When combined with a fall-arrest device, the PROGRESS ADJUST-I adjustable positioning lanyard enables comfortable positioning at a workstation when the user has support for their feet. Using the ADJUST rope adjuster, the length can be quickly and easily adjusted. The CAPTIV ADJUST and STUART accessories help hold the connectors in a good position for easy clipping. Depending on the configuration, it can be used in single or double mode. The PROGRESS ADJUST-I positioning lanyard is available in three lengths (2, 3, and 5 m).

Lanyards

Tree Care Lanyards

ZILLON

Adjustable work-positioning lanyard for tree care

The ZILLON work-positioning lanyard for tree care adjusts easily with only one hand, even when loaded. It is designed for use in double mode on the harness side attachment points, or in single mode on the ventral attachment point with the hand on the free end. The yellow color makes it highly visible. ZILLON lanyard ropes are also available individually.

Easy to adjust with one hand, due to the progressive locking/unlocking action of the device.

Pulley mounted on sealed ball bearings allows slack to be taken up easily.

MICROFLIP

Reinforced adjustable positioning lanyard for tree care work

MICROFLIP is a reinforced adjustable lanyard designed for positioning in tree care work. Its cable core reduces the risk of severing the lanyard and facilitates moving about on the trunk. The yellow color makes it highly visible. MICROFLIP lanyard ropes are also available individually.

MICROGRAB

Replacement cam-loaded rope clamp for MICROFLIP

Replacement rope clamp for MICROFLIP, featuring an ergonomic cam and integrated cam spring.

Helivac Lanyards

LEZARD

Helivac lanyard with securing of the drop-off/recovery phases

The LEZARD lanyard is designed for helivac at altitude. It allows the drop-off/recovery phases to be secured due to the adjustable arm that can be instantly ejected to free the victim, the rescuer, and the helicopter if the latter needs to suddenly leave its stationary position. Operating the LEZARD helivac lanyard is easy, with color-coded attachment elements that can be instantly identified and the ADJUST rope adjuster that can quickly and precisely adjust lanyard length.

IGUANE

Helivac lanyard for ground drop-off/recovery

The IGUANE lanyard is designed for ground helivac. Easy to use, with color-coded attachment elements that can be instantly identified. Lanyard available in two lengths.

The lower ends are equipped with STRING, which helps hold the carabiner in position and protects the webbing from wear.

Lanyard-End Connectors

VERTIGO TWIST-LOCK

Connector for progression lanyard

See page 58 for details on the VERTIGO TWIST-LOCK connector.

EASHOOK OPEN

Connector with gated connection point for double lanyard and work-positioning lanyard

See page 58 for details on the EASHOOK OPEN connector.

MGO OPEN

Auto-locking directional connector with large gate opening and a gated connection point

See page 58 for details on the MGO OPEN connector.

MOBILE FALL ARRESTERS

Installed on a lifeline, mobile fall arresters follow the user automatically as they move, whether on an inclined or vertical surface. In the event of a shock load or sudden acceleration, they lock onto the rope and stop the fall.

Mobile Fall Arresters

Installed on a lifeline, mobile fall arresters will lock in the event of a shock load or sudden acceleration.

• For fall protection

Mobile fall arrester that can be combined (or not) with an ASAP'SORBBER or ASAP'SORBBER AXESS energy absorber.

ASAP

• For fall protection, with locking function

Mobile fall arrester with locking function, used with an ASAP'SORBBER or ASAP'SORBBER AXESS energy absorber.

ASAP LOCK

Absorbers for Mobile Fall Arresters

These energy absorbers are for use only with an ASAP or ASAP LOCK mobile fall arrester. They limit the impact force transmitted to the user in the event of a fall.

ASAP'SORBBER

ASAP'SORBBER AXESS

Ropes for Mobile Fall Arresters

Ropes with sewn terminations for use with ASAP and ASAP LOCK mobile fall arresters.

RAY 11 mm
with sewn termination

Mobile Fall Arresters

Installed on a safety rope, the ASAP and ASAP LOCK mobile fall arresters connect to the harness fall-arrest attachment point. They follow the user in their movements, and in the event of a shock load or sudden acceleration, the devices lock and stop the fall.

• Constant fall protection

Integrated locking

In the event of a sudden movement due to a fall, slide, or uncontrolled descent, the ASAP and ASAP LOCK mobile fall arresters lock on the rope and stop the worker's fall, even if they grab the device with their hands.

Effective in many different situations

These mobile fall arresters work equally well on vertical or angled ropes, to adapt to a variety of different worksite situations.

• Simple to use

Quick installation

These mobile fall arresters may be quickly and easily installed anywhere on the rope by simply retracting the locking wheel.

No user action required

The ASAP and ASAP LOCK mobile fall arresters follow the worker in all their movements, without the need for any manual operation. This means they can focus completely on the task at hand.

Compatible with all Petzl ASAP'SORBBER energy absorbers

To meet different user needs, the mobile fall arresters are compatible with all of the energy absorbers in the line: ASAP'SORBBER (20 and 40 cm) and ASAP'SORBBER AXESS.

• For fall protection

Depending on the use, the ASAP mobile fall arrester can be combined (or not) with an ASAP'SORBBER energy absorber.

• For fall protection, with locking function

The ASAP LOCK has a locking function allowing users to reduce the potential fall distance. Additionally, it is drop-resistant when passing intermediate anchors. It is used with an ASAP'SORBBER energy-absorber.

ASAP®

Mobile fall arrester for rope

With its unique locking system, the ASAP sets the standard in fall protection for workers at height. In normal use, the device moves freely along the rope without any manual intervention and follows the user in all their movements. In the event of a shock load or sudden acceleration, the ASAP locks on the rope and stops the user. Depending on the intended use, the ASAP may also be combined with an ASAP'SORBBER or ASAP'SORBBER AXESS energy absorber to work at a distance from the rope.

ASAP® LOCK

Mobile fall arrester for rope, with locking function

The ASAP LOCK mobile fall arrester is designed to facilitate handling during rope ascents. In normal use, the device moves freely along the rope without any manual intervention and follows the user in all their movements. In the event of a shock load or sudden acceleration, the fall arrester locks on the rope and stops the user. The integrated locking function allows the user to immobilize the device in order to reduce the potential fall distance. The connection arm makes the system drop-resistant when passing intermediate anchors. The ASAP LOCK is used with an ASAP'SORBBER or ASAP'SORBBER AXESS energy absorber to work at a distance from the rope.

How to install the ASAP and ASAP LOCK on a lifeline

Mobile Fall Arresters

Absorbers for Mobile Fall Arresters

ASAP'SORBER

Energy absorber for ASAP and ASAP LOCK

The ASAP'SORBER energy absorber may only be used with an ASAP or ASAP LOCK mobile fall arrester. It allows the user to work at a distance from the rope, in order to protect it during certain work phases. Equipped with tear-webbing inside a pouch that opens on each end, the absorber is protected from abrasion, while allowing for regular inspection. It is available in two lengths to provide the best balance between distance from the rope and reduced fall distance.

ASAP'SORBER AXESS

Energy absorber for an ASAP or ASAP LOCK for a maximum load of 250 kg

The ASAP'SORBER AXESS energy absorber may only be used with the ASAP or ASAP LOCK mobile fall arrester. It allows the user to work at a distance from the rope, in order to protect it during certain work phases. Equipped with tear-webbing inside a pouch that opens on each end, the absorber is protected from abrasion, while allowing for regular inspection. It can be used in two-person rescue situations for a maximum load of 250 kg.

Ropes for Mobile Fall Arresters

ASAP'AXIS 11 mm

Low stretch kernmantle rope with sewn termination and integrated energy dissipater, for use with an ASAP mobile fall arrester

The ASAP'AXIS 11 mm low stretch kernmantle rope with sewn termination and integrated energy dissipater is designed for use with an ASAP mobile fall arrester. The energy dissipater is integrated with the rope and meets the requirements of the European EN 353-2 standard for fall protection. The standard diameter provides a good grip for easier handling. EverFlex technology provides great flexibility and consistent performance over time. The sewn termination features the STUART accessory that helps keep the connector in position to facilitate handling. Rope available in six lengths.

AXIS 11 mm With Sewn Termination

Low stretch kernmantle rope with sewn termination for use with an ASAP LOCK mobile fall arrester

The AXIS 11 mm low stretch kernmantle rope with sewn termination is designed for use with an ASAP LOCK mobile fall arrester and an ASAP'SORBER or ASAP'SORBER AXESS energy absorber. It has a sewn termination with a protective sheath that helps keep the connector in position, allowing it to meet the requirements of the European EN 353-2 standard for fall protection. The standard diameter provides a good grip for easier handling. EverFlex technology provides great flexibility and consistent performance over time. Rope available in six lengths.

RAY 11 mm With Sewn Termination

Static rope with sewn termination for use with ASAP and ASAP LOCK mobile fall arresters

The RAY 11 mm static rope with sewn termination is designed for use with an ASAP or ASAP LOCK mobile fall arrester. It has low elongation under load, allowing it to meet the requirements of the ANSI Z359.15 American fall protection standard. The standard diameter provides a good grip for easier handling. EverFlex technology provides great flexibility and consistent performance over time. The sewn termination with protective sheath helps keep the connector in position and facilitates handling. Rope available in five lengths.

CONNECTORS

To address various situations encountered in the field, Petzl offers several types of connectors, with different shapes, sizes, gate openings, and locking systems.

Construction of gravity-based foundations for an offshore wind farm, Le Havre, France
© 2022 Petzl Distribution - Vuedici.org - Ouest Acro - Bouygues travaux publics - Fécamp offshore wind farm

Keylock System: helps prevent snagging

To provide optimal efficiency, all Petzl carabiners use the Keylock system: the nose of the carabiner, where the body and gate meet, does not have a notch that could snag on anchors, ropes, harness equipment loops, or other gear.

Visual locking indicator

To facilitate equipment checks, SCREW-LOCK manual locking carabiners have a red band that is visible only when the carabiner is not locked.

Lightweight Carabiners

Aluminum carabiners designed for workers at height.

Ultra-Lightweight Carabiners

Compact aluminum carabiners for workers at height looking to reduce weight to a minimum.

High-Strength Carabiners

Carabiners suitable for difficult environments, primarily used for setting up anchors and for connecting to metal structures.

Lanyard-End Connectors

Connectors designed for lanyard ends.

Special Carabiners

Aluminum carabiners designed for specific uses: with groups, for additional braking with a descender, and for harness fastening.

Semi-Permanent Connectors

Connectors designed for semi-permanent connection of equipment.

Connector Positioning Accessories

Accessories that keep the carabiner correctly positioned in devices and at the end of a lanyard.

Connectors

Lightweight Carabiners

- Design facilitates handling

Fluid interior design

Fluid interior design limits the risk of having a catch point and facilitates rotation of the carabiner.

Optimal strength-to-weight ratio

The H-shaped cross section provides an optimal strength-to-weight ratio and protects the markings from abrasion.

- Multiple locking systems depending on the intensity of use:

- For frequent use:

TRIACT-LOCK automatic system:

Unlocking is accomplished by raising, then turning the sleeve.

BALL-LOCK automatic system:

Unlocking is accomplished by pressing on the green indicator, then turning the sleeve. The green visual indicator is visible only when the gate is locked.

- For occasional use:

SCREW-LOCK manual system:

This system is ideal for harsh environments where contaminants (mud, ice) could cause an automatic locking system to jam. The red visual indicator is visible when the carabiner is unlocked.

- For connecting to equipment that has a large cross section

The OK carabiner has a symmetrical oval shape for optimal loading of devices with a large cross section, such as pulleys, rope clamps, or mobile fall arresters.

- For connecting equipment such as descenders or positioning lanyards

The Am'D carabiner has an asymmetrical D shape that is ideal for attaching equipment such as descenders or positioning lanyards.

- For connecting multiple items

The WILLIAM has an asymmetrical pear shape, with a large capacity for attaching multiple elements, and a large gate opening to facilitate their installation.

CAPTIV
COMPATIBLE

OK

Lightweight oval carabiner

The lightweight OK carabiner is made of aluminum. It has an oval shape that allows optimal loading of devices with a large cross section, such as pulleys, rope clamps, and mobile fall arresters. Designed with a smooth interior and Keylock system for ease of use. It is available in three locking systems: automatic TRIACT-LOCK or BALL-LOCK, or manual SCREW-LOCK. OK can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

CAPTIV
COMPATIBLE

Am'D

Lightweight asymmetrical carabiner

The Am'D lightweight asymmetrical carabiner is made of aluminum. It has a D shape particularly suited for connecting to diverse equipment such as descenders or positioning lanyards. Designed with a smooth interior and Keylock system for ease of use. The Am'D carabiner is available in three locking systems: automatic TRIACT-LOCK or BALL-LOCK system, or manual SCREW-LOCK system. Am'D can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

CAPTIV
COMPATIBLE

WILLIAM

Lightweight asymmetrical large-capacity carabiner

The lightweight WILLIAM large-capacity asymmetrical carabiner is made of aluminum. The pear shape makes it easy to attach multiple items. Designed with a smooth interior and Keylock system for ease of use. The WILLIAM carabiner is available in three locking systems: automatic TRIACT-LOCK or BALL-LOCK, or manual SCREW-LOCK. WILLIAM can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

Connectors

Ultra-Lightweight Carabiners

Sm'D

Ultra-lightweight asymmetrical carabiner

The compact Sm'D asymmetrical aluminum carabiner is recommended for workers at height looking to reduce weight to a minimum. The D shape makes it especially suitable for attaching devices. It is available in two locking systems (automatic TRIACT-LOCK system or manual SCREW-LOCK system), or without a locking system.

High-Strength Carabiners

OXAN

High-strength oval carabiner

OXAN is a high-strength steel carabiner designed for use in harsh environments. The oval, symmetrical shape allows the carabiner to be loaded in the optimal position when setting up anchors or connecting to metal structures. It is available in two locking systems: automatic TRIACT-LOCK system or manual SCREW-LOCK system. OXAN TRIACT-LOCK is available in European or international versions. OXAN can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

The oval, symmetrical shape allows the carabiner to be loaded in the optimal position when setting up anchors. The CAPTIV positioning bar helps orient the carabiner to load the major axis, limits the risk of rotation, and keeps it integrated to the device or lanyard.

VULCAN

High-strength, large-capacity, asymmetrical carabiner

VULCAN is a high-strength steel carabiner designed for use in harsh environments. The large-capacity asymmetrical shape is ideal for setting multiple anchors. The VULCAN carabiner is available in two locking systems: automatic TRIACT-LOCK system or manual SCREW-LOCK system. VULCAN TRIACT-LOCK is available in European or international versions. VULCAN can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

Bm'D

Lightweight asymmetrical high-strength carabiner

The Bm'D lightweight asymmetrical carabiner is made of aluminum. It has a D shape particularly suited for connecting to diverse equipment such as descenders or positioning lanyards. Designed with a smooth interior and Keylock system for ease of use. The Bm'D carabiner has the TRIACT-LOCK automatic locking system. The sleeve is reinforced for greater inward and lateral gate strength. Bm'D can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

The sleeve is reinforced for greater inward and lateral gate strength.

Lanyard-End Connectors

VERTIGO TWIST-LOCK

Connector for progression lanyard

The VERTIGO TWIST-LOCK connector is designed for use on progression lanyards. The excellent grip and automatic locking system facilitate handling when passing intermediate anchors. The large opening and the Keylock system allow the connector to be easily connected. VERTIGO TWIST-LOCK can be used with a CAPTIVO positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

EASHOOK OPEN

Connector with gated connection point for double lanyard and work-positioning lanyard

The EASHOOK OPEN connector is designed for use at the ends of a double lanyard or work-positioning lanyard. The gated connection point allows the connector to be directly attached to the lanyard. If the lanyard is damaged, the connector can be reused. The excellent grip and automatic locking system facilitate handling when passing intermediate anchors.

MGO OPEN

Auto-locking directional connector with large gate opening and a gated connection point

MGO OPEN is an auto-locking directional connector with a large gate opening for connection to metal structures or to large-diameter cables and bars. It has a gated connection point for attachment to different types of lanyards. If the lanyard is damaged, the connector can be reused. MGO OPEN is available in two versions: 60 and 110 mm.

Special Carabiners

Am'D PIN-LOCK

Asymmetrical aluminum carabiner, unlocks with a tool

The Am'D PIN-LOCK asymmetrical aluminum carabiner is designed for use with groups. It secures the connection of the participant with a PIN-LOCK system, which can only be opened by the operator with a specific unlocking tool. Am'D PIN-LOCK can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

FREINO Z

Carabiner with friction spur for descenders

The FREINO Z carabiner has a friction spur for adding or adjusting friction during the descent. It is easy to use and compatible with I'D S, I'D L, I'D EVAC, and RIG self-braking descenders. When rotated, it makes the descender drop-resistant when being transferred from the equipment loop to the ventral attachment point or anchor. The FREINO Z has the TRIACT-LOCK automatic locking system.

OMNI

Multidirectional semi-circle carabiner

Multidirectional semi-circle OMNI carabiner for fastening the FALCON ASCENT harness and for attaching a CROLL ventral rope clamp. It is available in two locking systems: automatic TRIACT-LOCK system or manual SCREW-LOCK system.

Semi-Permanent Connectors

RING OPEN

Multidirectional gated ring

The RING OPEN gated ring is designed for semi-permanent connection of equipment. The round shape allows it to function optimally in all directions. It has a large opening that allows installation of ropes with sewn terminations.

DELTA

Triangular steel quick link

When closed with a wrench, this steel quick link becomes a semi-permanent anchor ring.

GO

Oval steel quick link

When closed with a wrench, this steel quick link becomes a semi-permanent anchor ring.

DEMI ROND

Semi-circle aluminum alloy quick link

When closed with a wrench, this aluminum quick link is used to fasten harnesses that have two attachment points that must be joined with a connector.

Connectors

Connector Positioning Accessories

CAPTIV

Connector positioning bar (pack of 10)

The CAPTIV positioning bar helps orient the carabiner to load the major axis, limits the risk of rotation, and keeps it integrated with the device or lanyard. CAPTIV is compatible with OK, Am'D, WILLIAM, OXAN, VULCAN, Bm'D carabiners, and the ROLLCLIP A pulley carabiner.

CAPTIVO

Positioning bar for the VERTIGO TWIST-LOCK connector (pack of 10)

The CAPTIVO positioning bar integrates the connector with the lanyard, helps orient the connector to load the major axis, and limits the risk of rotation. CAPTIVO is only compatible with the VERTIGO TWIST-LOCK connector.

CAPTIV ADJUST

Carabiner positioning bar combined with an ADJUST rope adjuster

The CAPTIV ADJUST positioning bar helps orient the carabiner to load the major axis and hold the ADJUST rope adjuster in the proper position to reduce the risk of accidental release. It helps keep the lanyard and rope adjuster integrated with the carabiner, reducing the risk of losing them. CAPTIV ADJUST is compatible with OK, Am'D, Bm'D, and OXAN carabiners.

STUART

Connector positioning accessory (pack of 10)

STUART helps keep the connector in the correct position and facilitates clipping. It is compatible with most auto-locking connectors.

TANGA

Connector positioning ring (pack of 10)

The TANGA positioning ring helps hold the connector in the correct position.

STRING

Accessory for maintaining connector orientation and protecting the webbing (pack of 10)

STRING helps maintain the proper orientation of the connector and protects the webbing from wear.

DESCENDERS

Descenders are designed to help regulate friction and control the descent on a fixed rope. They allow a worker to position themselves at any point on the rope. Certain Petzl descenders can also be used as belay devices.

Self-Braking Descenders

Self-braking descenders with ergonomic handle and AUTO-LOCK system allow a comfortably controlled descent and easy positioning at the workstation. These devices are designed for work at height, rope access, and technical rescue and evacuation.

Descenders for Technical Rescue

Descenders with integrated progress-capture pulley and AUTO-LOCK system to facilitate lowering and raising heavy loads.

Mechanical Prusiks for Tree Care

Mechanical Prusiks allow the user to move around efficiently in a tree while benefiting from the handling of a classic Prusik pulley system.

Standard Descenders

Descenders with a simple design, using the friction between the rope and the device to brake a descent. The speed of the descent is regulated by varying the grip on the free end of the rope.

Personal Escape System

Rescue device that allows a single person to get themselves out of a building or structure in the event of an emergency. It has a multipurpose anchor hook adapted for locations where the possibility of finding an anchor point is uncertain.

Descenders

Self-Braking Descenders

Easy to use, self-braking descenders adapt to a variety of situations encountered during work at height, rope access work, or technical rescue: descending, work positioning, short rope ascents, belaying with climbing techniques.

• Easy to use

AUTO-LOCK system

The AUTO-LOCK system allows users to easily position themselves at a workstation without having to manipulate the handle or tie off the device: as soon as the user releases the handle, the rope is automatically locked in the device.

Installing the rope

The device has a safety gate on the moving side plate that allows the rope to be easily installed while the device remains connected to the harness.

Comfortable, controlled descent

The ergonomic handle allows unlocking the rope and comfortably controlling the descent. Two descent modes are possible: on the side plate or in the V-shaped friction channel.

• Versatile

Self-braking descenders are versatile and can be used for both descents and short rope ascents.

• Wear-resistant

The stainless steel wear plate improves durability by reinforcing the rope friction zone.

• With anti-panic function and anti-error catch

Designed for work at height, rope access, and technical rescue and evacuation, these devices are equipped with an anti-panic function and an anti-error catch, to reduce the risk of an accident due to user error. They are also compatible with auxiliary brakes, which help increase the friction for lowering heavy loads.

• Compact and lightweight

The RIG descender is compact and lightweight, and designed for experienced rope access workers.

I'D self-braking descenders with anti-panic function

I'D® S

Self-braking descender with anti-panic function for work at height and rope access work

The self-braking I'D S descender is primarily designed for work at height and rope access work. It has an ergonomic handle that allows comfortable descent control. The integrated anti-panic function and anti-error catch reduce the risk of an accident due to user error. The AUTO-LOCK system allows users to easily position themselves at the workstation without having to manipulate the handle or tie off the device. Once locked, the rope can be taken up without having to manipulate the handle. The safety gate allows the rope to be installed with the device remaining connected to the harness. I'D S is compatible with 10 to 11.5 mm ropes and allows handling of loads up to 250 kg.

I'D® L

Self-braking descender with anti-panic function for rescue

The I'D L self-braking descender is primarily designed for rescue. It has an ergonomic handle that allows comfortable descent control. The integrated anti-panic function and anti-error catch reduce the risk of an accident due to user error. The AUTO-LOCK system allows users to position themselves without having to manipulate the handle or tie off the device. Once locked, the rope can be taken up without having to manipulate the handle. The safety gate allows the rope to be installed with the device remaining connected to the harness. I'D L is compatible with 12.5 to 13 mm ropes and allows handling of loads up to 280 kg.

I'D® EVAC

Self-braking descender with anti-panic function for lowering from an anchor

The I'D EVAC self-braking descender is primarily designed for lowering from an anchor. The ergonomic handle is specifically oriented for managing a load from the anchor and offers comfortable descent control. The integrated anti-panic function and anti-error catch reduce the risk of an accident due to user error. The AUTO-LOCK system allows the rope to be automatically locked without having to manipulate the handle or tie off the device. Once locked, the rope can be taken up without having to manipulate the handle. The safety gate allows the rope to be installed with the device remaining connected to the anchor. I'D EVAC is compatible with 10 to 11.5 mm ropes and allows handling of loads up to 250 kg.

Accessories

Open Auxiliary Brake for I'D®

Open auxiliary brake for I'D S, I'D L, and I'D EVAC self-braking descenders

The open auxiliary brake is designed for I'D self-braking descenders. It is used to add friction depending on the load and rope diameter, and allows the rope to be inserted or removed at any time.

Closed Auxiliary Brake for I'D®

Closed auxiliary brake for I'D S, I'D L, and I'D EVAC self-braking descenders

The closed auxiliary brake is designed for I'D self-braking descenders. It is used to add friction depending on the load and rope diameter and provides a constant redirect of the rope.

RIG®

Compact self-braking descender for rope access, designed for experienced users

RIG is a compact self-braking descender for rope access, designed for experienced users. It has an ergonomic handle that allows comfortable descent control. The AUTO-LOCK system allows users to easily position themselves at the workstation without having to manipulate the handle or tie off the device. Once locked, the rope can be taken up without having to manipulate the handle. The safety gate allows the rope to be installed with the device remaining connected to the harness.

Descenders

Descenders for Technical Rescue

These descenders offer the versatility required for technical rescue operations: lowering, hauling, handling heavy loads, use in the primary system or in a back-up belay.

- **Easy rope installation**

Markings on the device make rope installation quick and easy.

- **Comfortable, controlled descent, even with heavy loads**

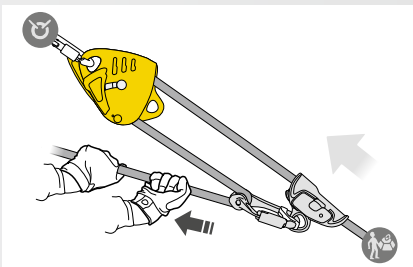

The ergonomic handle and integrated brake enable a comfortably controlled descent.

The faceted sheave creates additional friction zones for the rope, providing extra braking for lowering heavy loads.

- **Excellent hauling efficiency**

The integrated progress-capture pulley with very large diameter sheave mounted on sealed ball bearings rotates in only one direction for excellent hauling efficiency. The lower connection point can be used to create different types of haul systems.

- **AUTO-LOCK system: automatically locks the rope**

AUTO-LOCK SYSTEM

The AUTO-LOCK system allows automatic locking of the rope when the handle is not in use. Once locked, the rope can be taken up without having to manipulate the handle.

▶ MAESTRO descenders with integrated progress-capture pulley

MAESTRO® S

Descender with integrated progress-capture pulley for loads up to 250 kg, compatible with 10.5 to 11.5 mm ropes

MAESTRO S is a descender designed for technical rescue operations. It makes it easier to manipulate heavy loads when lowering or hauling, and may be used in both the primary system or in a back-up belay. This versatility allows rescuers to adapt to a variety of different situations they may encounter on the rescue scene. The ergonomic handle and integrated brake enable a comfortably controlled descent. Shifting from lowering position to raising position is immediate, without the need to transfer the load. The integrated progress-capture pulley has a large diameter sheave mounted on sealed ball bearings, providing excellent hauling efficiency. The AUTO-LOCK system automatically locks the rope when the handle is not in use. Once locked, the rope can be taken up without having to manipulate the handle. The MAESTRO S descender is compatible with 10.5 to 11.5 mm ropes and allows handling of loads up to 250 kg.

MAESTRO® L

Descender with integrated progress-capture pulley for loads up to 280 kg, compatible with 12.5 to 13 mm ropes

MAESTRO L is a descender designed for technical rescue operations. It makes it easier to manipulate heavy loads when lowering or hauling, and may be used in both the primary system or in a back-up belay. This versatility allows rescuers to adapt to a variety of different situations they may encounter on the rescue scene. The ergonomic handle and integrated brake enable a comfortably controlled descent. Shifting from lowering position to raising position is immediate, without the need to transfer the load. The integrated progress-capture pulley has a large diameter sheave mounted on sealed ball bearings, providing excellent hauling efficiency. The AUTO-LOCK system automatically locks the rope when the handle is not in use. Once locked, the rope can be taken up without having to manipulate the handle. The MAESTRO L descender is compatible with 12.5 to 13 mm ropes and allows handling of loads up to 280 kg.

Descenders

Mechanical Prusiks for Tree Care

Mechanical Prusiks allow arborists to optimize their movement within a tree. They are user-friendly and intuitive to use. To meet a variety of needs, they can be used on doubled ropes or a single rope.

• Intuitive design

The technique is identical to that of a classic Prusik pulley system, offering immediate usability. The device locks automatically once the friction chain is extended.

• For efficient movement

Smooth, precise rope feed

The release lever is mounted on a spring for great precision when moving around. Adjusting the pressure on this lever controls the speed of movement.

Slack easily taken up

The pulley is mounted on sealed ball bearings to allow the slack to be taken up easily when moving around. The widely spaced side plates also contribute to smooth rope glide.

• Versatile

Use on doubled ropes

ZIGZAG and ZIGZAG PLUS can be used on doubled ropes.

Use on a single rope

They can also be used on a single rope, thanks to the CHICANE accessory, which offers more friction on the descent, and the KNEE ASCENT assemblies, which facilitate the ascent.

• Standard version

The lower attachment hole is fixed to maintain alignment of the device with the axis of the worker and to optimize grip.

• Version with high-efficiency swivel

The lower attachment hole with high-efficiency swivel provides stable and correct positioning of the mechanical Prusik and optimal rope glide through the device.

ZIGZAG®

Mechanical Prusik for tree care

The ZIGZAG mechanical Prusik allows the user to move around efficiently in a tree using classic Prusik pulley system technique. The friction chain provides precision and fluidity when moving around. The pulley is mounted on sealed ball bearings to allow the slack to be taken up easily. Can be used on either doubled ropes or a single rope, providing great versatility. The lower attachment hole is fixed to maintain alignment of the device with the axis of the worker and to optimize grip.

 ZIGZAG PLUS mechanical Prusik

ZIGZAG® PLUS

Mechanical Prusik with high-efficiency swivel, for tree care

The ZIGZAG PLUS mechanical Prusik allows the user to move around efficiently in a tree using classic Prusik pulley system technique. The friction chain provides precision and fluidity when moving around. The pulley is mounted on sealed ball bearings to allow the slack to be taken up easily. Can be used on either doubled ropes or a single rope, providing great versatility. The lower attachment hole with high-efficiency swivel provides stable and correct positioning of the mechanical Prusik and optimal rope glide through the device.

Accessory

CHICANE

Auxiliary brake for mechanical Prusik on single ropes, for tree care

The CHICANE auxiliary braking device allows ZIGZAG and ZIGZAG PLUS mechanical Prusiks to be used on single ropes. It provides continuous additional friction on descents. The excellent compatibility of the CHICANE and mechanical Prusik as an assembled unit provides smooth rope glide through the brake during ascents. The ergonomic handle provides excellent grip and facilitates movement while limb walking. With the openable side plate, installation is quick and easy.

Descenders

Standard Descenders

HUIT

Figure-eight descender

Figure-eight descender, compact and lightweight. Square shape helps reduce rope twist.

RACK

Variable friction descender with brake bars

The design and configuration of the RACK bars make it easy to set up and insert the rope. Compact and lightweight, the device allows the user to adjust the amount of friction during the descent to adapt to changing conditions.

Personal Escape System

EXO® AP HOOK

Personal escape system with anchor hook

EXO AP HOOK is a personal escape system with a HOOK anchor hook, adapted for situations where the possibility of finding an anchor point is uncertain. It has a self-braking system with anti-panic function for quickly moving horizontally, climbing through a window, and controlling or stopping a descent. If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically. EXO AP HOOK also includes a rope that resists wear and high temperatures, an Am'D connector with CAPTIV positioning bar, and a bag for transporting and attaching the system directly to the harness. Other rope lengths and other types of connectors (such as the EASHOOK OPEN) are available by special order.

If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically.

The anchor hook may be used around a structure, secured with a locking hitch.

Petzl Custom allows you to choose:

- Rope type: Standard or high-strength rope
- Rope color
- Rope length
- Type of rope-end connectors and harness connector

The assembly of various components of your choice offers a ready-made solution specific to the user, delivered in a transport pouch or bag adapted to the length of the rope.

Because of the unique shape of the anchor hook, special Petzl training for the EXO AP HOOK is mandatory.

ROPE CLAMPS

Petzl rope clamps are primarily used for progression on ropes and for setting up haul systems.

Installing monitors on the spire of the St Michel Church, Bordeaux, France © 2021 Petzl Distribution - Vuedici.org - Adréaline - Bordeaux City Hall

Optimal locking

Petzl frame-loaded rope clamps are designed to function optimally under many different conditions (wet, frozen, dirty ropes, for example). They are therefore equipped with a special stainless steel cam. Its unique design, the shape of its teeth, and its self-cleaning slot allow optimal grip on the rope without damaging it, while reducing the effort required to slide the device up the rope.

Rope Clamps for Progression

Frame-loaded rope clamps are easy to install and specially designed for rope ascents (handled rope clamps, ventral rope clamps, and foot ascenders).

ASCENSION

CROLL S

CROLL L

SECUR

KNEE ASCENT LOOP

KNEE ASCENT CLIP

ASCENTREE

PANTIN

Versatile Rope Clamp

Rope clamp that can be used to ascend a fixed rope, or as progress capture in a haul system.

BASIC

Back-Up Rope Clamp

Ultra-compact, lightweight rope clamp for occasional rope ascents and haul systems.

TIBLOC

Cam-Loaded Rope Clamp

Rope clamp designed for use in haul systems as a tractor or progress-capture device.

RESCUCENDER

Rope Clamps

Rope Clamps for Progression

ASCENSION
left-handed

ASCENSION
right-handed

ASCENSION

Handled rope clamp for rope ascents

The ASCENSION handled rope clamp is designed for rope ascents and features an overmolded grip and ergonomic upper part for a comfortable and powerful grip when pulling with one or two hands. The ASCENSION handled rope clamp has a large lower hole for easily attaching two carabiners for a lanyard and foot loop.

The overmolded dual-density grip has an area for the index finger and a wide, supportive base to keep the hand from slipping. Ergonomic upper part maximizes power when pulling with two hands.

PROGRESS ADJUST-Y

Double adjustable progression lanyard

Find a description of the PROGRESS ADJUST-Y lanyard on page 50.

FOOTAPE

Adjustable webbing foot loop

The adjustable FOOTAPE foot loop is used with an ASCENSION or BASIC rope clamp for rope ascents. A height-adjustable elastic band keeps the foot in the loop, regardless of shoe type.

FOOTCORD

Adjustable cord foot loop

The adjustable FOOTCORD foot loop is used with an ASCENSION or BASIC rope clamp for rope ascents. Its high-modulus polyethylene construction increases durability. A height-adjustable elastic band keeps the foot in the loop, regardless of shoe type.

LOOPING

Four-step etrier

The LOOPING four-step etrier attaches to an ASCENSION rope clamp for rope ascents or directly onto an anchor for progression in overhangs.

CROLL® Ventral rope clamp

Designed for rope ascents, the CROLL ventral rope clamp is simple to use, with a pinch opening system, which is totally integrated in the clamp to avoid any involuntary snagging. The attachment holes allow efficient positioning during ascents. It is available in two versions to adapt to different rope diameters.

SECUR Shoulder straps for positioning the CROLL ventral rope clamp

SECUR shoulder straps position the CROLL ventral rope clamp and attach to AVAO SIT, FALCON, FALCON ASCENT, and SEQUOIA SRT harnesses.

ASCENTREE Double-handled rope clamp for tree care

Handled rope clamp designed for double rope ascents, the ASCENTREE has ergonomic handles allowing a comfortable and powerful grip when pulling. Catch/cam unit is totally integrated to prevent any involuntary snagging.

PANTIN
left-foot

PANTIN
right-foot

PANTIN® Foot ascender

The PANTIN foot ascender is used with the CROLL, ASCENSION, or ASCENTREE rope clamps to make rope ascents faster and less tiring. It is available in right- and left-foot versions.

Catch to keep the rope in the device during rope ascents.

Installing the
KNEE ASCENT

KNEE ASCENT LOOP

Knee ascender assembly with foot loop to facilitate ascents on a single rope, for tree care

The KNEE ASCENT LOOP assembly facilitates the arborist's ascent when using the ZIGZAG or ZIGZAG PLUS mechanical Prusik on a single rope. It contains an upper strap, a CROLL L rope clamp, a lower strap with foot loop, and a TOOLBAG 1.5 tool pouch. The system is fully adjustable and adapts to different body types.

KNEE ASCENT CLIP

Knee ascender assembly with boot connector, facilitating single rope ascents, for tree care

The KNEE ASCENT CLIP assembly facilitates the arborist's ascent when using the ZIGZAG or ZIGZAG PLUS mechanical Prusik on a single rope. It contains an upper strap, a CROLL L rope clamp, a lower strap with connector that attaches to the sewn webbing on the top of the arborist's boot, and a TOOLBAG 1.5 tool pouch. The system is fully adjustable and adapts to different body types.

Rope Clamps

Versatile Rope Clamp

BASIC

Compact, versatile rope clamp

The BASIC rope clamp is very compact, making it easy to grip. The large lower hole allows lanyard and foot loop carabiners to be easily connected.

Back-Up Rope Clamp

TIBLOC

Back-Up Rope Clamp

Extremely compact and lightweight, the TIBLOC is a back-up rope clamp for ascending ropes or setting up haul systems.

Cam-Loaded Rope Clamp

RESCUCENDER

Openable cam-loaded rope clamp

Simple to use and ergonomic, the RESCUCENDER is an openable cam-loaded rope clamp designed for use in haul systems as a tractor or progress-capture device.

Openable guided cam allows easy installation or removal of the rope clamp at any point on the rope.

The safety catches are equipped with indicators that show when they are unlocked.

PULLEYS

Pulleys are used for raising equipment and for making haul systems in a rescue situation. Some of them can be combined with a rope clamp to facilitate maneuvers; others allow movement along rope or cable.

Construction of gravity-based foundations for an offshore wind farm, Le Havre, France
© 2022 Petzl Distribution - Vuedici.org - Ouest Acro - Bouygues travaux publics - Fécamp offshore wind farm

Two factors determine a pulley's efficiency:

- Sheave size: the larger the sheave diameter, the higher the efficiency
- Bushings and bearings:
 - Self-lubricating bushings are efficient, but they must be regularly maintained
 - Sealed ball bearings are very efficient, and they do not require any maintenance

High-Efficiency Pulleys With Swivel

High-performance pulleys equipped with a swivel, making them drop-resistant while installing the rope.

High-Efficiency Pulleys

Versatile, high-performance pulleys adapted for intensive use.

Pulley-Carabiners

Pulley-carabiners with excellent efficiency.

Progress-Capture Pulleys

Pulleys with an integrated progress-capture system may be used to replace a traditional pulley/rope clamp setup in haul systems.

Prusik Pulleys

High-performance pulleys designed for use with a Prusik friction hitch to build a lightweight progress-capture system. The shape of the side plates allows the knot to be released when it stops against the pulley.

Single Pulleys

Lightweight, versatile pulleys designed for situations that do not require a high level of efficiency (such as redirecting the rope).

Transport Pulleys

Pulleys designed for movement along a rope or cable.

Haul System

Ready-to-use kit, designed to easily pick off and lower (or simply pick off) a victim.

High-Efficiency Pulleys With Swivel

▶ SPIN L1 and SPIN L2 pulleys

SPIN L1

Very high efficiency single pulley with swivel

Possible to open, even when attached to the anchor, the SPIN L1 pulley is designed for maximum simplicity in setting up haul or load deviation systems and tensioned highlines. The large-diameter sheave mounted on sealed ball bearings gives it excellent efficiency. The swivel makes it easier to operate, allowing the pulley to be oriented under load and for carabiners, ropes, or slings to be directly connected.

SPIN L2

Very high efficiency double pulley with swivel

Possible to open, even when attached to the anchor, the SPIN L2 is a double pulley designed for maximum simplicity when setting up haul systems or tensioned highlines. The two parallel-mounted sheaves and auxiliary attachment point allow the pulley to be used to set up various types of complex haul systems. The large-diameter sheaves mounted on sealed ball bearings provide excellent efficiency. The swivel makes it easier to operate, allowing the pulley to be oriented under load and for carabiners, ropes, or slings to be directly connected.

▶ SPIN L1D pulley

SPIN L1D

Very high efficiency single pulley with one-way rotation and swivel

Possible to open, even when attached to the anchor, the SPIN L1D pulley is designed to be used in conjunction with a descender for maximum simplicity when setting up a deviation for a heavy load. The faceted sheave only rotates in one direction, providing excellent efficiency when hauling, and adding friction zones for the rope for additional braking when lowering. The swivel makes it easier to operate, allowing the pulley to be oriented under load and for carabiners, ropes, or slings to be directly connected.

▶ SPIN S1 and SPIN S1 OPEN pulleys

SPIN S1

Very high-efficiency, compact single pulley with swivel

Possible to open, even when attached to the anchor, the SPIN S1 pulley is designed for maximum simplicity in setting up haul or load deviation systems and tensioned highlines. Compact, reducing weight and bulk, which is especially useful during technical rescue. The sheave mounted on sealed ball bearings provides excellent efficiency. The swivel makes it easier to operate, allowing the pulley to be oriented under load and for carabiners, ropes, or slings to be directly connected.

SPIN S1 OPEN

Very high-efficiency, compact single pulley with gated swivel

Possible to open, even when attached to the anchor, the SPIN S1 OPEN pulley is designed for maximum simplicity in setting up haul or load deviation systems and tensioned highlines. Compact, reducing weight and bulk, which is especially useful during technical rescue. The sheave mounted on sealed ball bearings provides excellent efficiency. The swivel facilitates operations, allowing the pulley to be oriented under load. The opening gate on the swivel makes the pulley compatible with a wide variety of products, (tripod, REEVE pulley, PAW rigging plates, and more) reducing bulk during setup.

High-Efficiency Pulleys

PARTNER

Ultra-compact, high-efficiency pulley

The PARTNER is an ultra compact, extremely lightweight pulley. It is designed for daily tasks and on-site rescue.

RESCUE

High-strength, very high-efficiency pulley

The very high efficiency RESCUE pulley is designed for intensive use by rescue professionals.

Pulley-Carabiners

ROLLCLIP A

Pulley-carabiner that facilitates installation of the rope when pulley is connected to the anchor

ROLLCLIP A is a pulley-carabiner with the gate opening on the pulley end, to facilitate rope installation when the pulley is fixed to the anchor. It is available with an automatic TRIACT-LOCK locking system, or without a locking system. ROLLCLIP A can be used with a CAPTIV positioning bar to help orient the carabiner to load the major axis, limit the risk of rotation, and keep it integrated with the device.

ROLLCLIP Z

Pulley-carabiner that facilitates installation on anchors and devices

ROLLCLIP Z is a pulley-carabiner with the gate opening on the non-pulley end, to facilitate installation on anchors and devices. It is available in two locking systems: automatic TRIACT-LOCK system or manual SCREW-LOCK system.

Progress-Capture Pulleys

PRO TRAXION

Very high-efficiency, drop-resistant progress-capture pulley with swivel

Possible to open, even when attached to the anchor, the PRO TRAXION progress-capture pulley is designed for setting up haul systems. With a large diameter sheave mounted on sealed ball bearings and excellent efficiency, it is particularly suitable for hauling heavy loads. The swivel makes it easier to operate, allowing the pulley to be oriented under load, and for carabiners, ropes, or slings to be directly connected.

MINI TRAXION

Compact and drop-resistant high-efficiency progress-capture pulley

Possible to open, even when attached to the anchor, the MINI TRAXION progress-capture pulley is designed for setting up haul systems. With a medium-diameter sheave and great efficiency, it is particularly suitable for hauling mid-weight loads. It is compact, with minimized weight and bulk, which is especially useful during technical rescue and rope access work.

MINI TRAXION progress-capture pulley

Triple-action opening of the moving side plate is quick and easy, even with gloves.

The rope can be installed in the MINI TRAXION pulley when it is connected to the anchor.

Pulleys

Prusik Pulleys

MINI

Highly efficient and lightweight Prusik pulley

The MINI compact pulley offers a lightweight solution for setting up progress-capture haul systems.

GEMINI

Highly efficient and lightweight double Prusik pulley

GEMINI is a compact double pulley for setting up progress-capture haul systems of high mechanical advantage.

MINDER

High strength, very high efficiency Prusik pulley

MINDER is a high-strength pulley designed for rescue professionals, for setting up progress-capture haul systems.

TWIN

High-strength, very high efficiency double Prusik pulley

TWIN is a high-strength double pulley designed for rescue professionals. It can be used to set up progress-capture haul systems of high mechanical advantage.

Single Pulleys

MOBILE

Versatile ultra-compact pulley

Compact and extremely lightweight, the MOBILE pulley is designed for a variety of uses.

FIXE

Versatile compact pulley

Versatile and compact, the FIXE pulley allows quick installation onto the rope.

Transport Pulleys

REEVE

Carriage pulley for rescue on a tensioned highline

Combining two pulleys and a rigging plate, the REEVE carriage pulley is an integrated solution designed to simplify setting up rescue systems on tensioned highlines. The compact design limits the number of connectors and the height of the system. Two large-diameter sheaves mounted on sealed ball bearings provide excellent efficiency when moving. Multiple connection holes to directly attach ropes, slings, or carabiners, allowing for better organization.

REEVE carriage pulley

Triple-action opening of the moving side plates is quick and easy, even with gloves.

Two red indicators provide a visual warning when the moving side plates are unlocked.

TANDEM® / TANDEM® SPEED

Double pulleys for tensioned highlines

TANDEM and TANDEM SPEED are designed for tensioned highlines on cables or ropes, and can accommodate up to three connectors to facilitate operations. TANDEM is used on a rope. TANDEM SPEED can also be used on a cable because of its wear-resistant sheaves mounted on sealed ball bearings.

KOOTENAY

Knot-passing pulley

KOOTENAY is a knot-passing pulley that allows passage of joining knots. The large-diameter sheave mounted on sealed ball bearings provides excellent efficiency.

ROLLCAB

Roller for movement along cable

ROLLCAB is a roller designed for movement and evacuation along mechanical lift cables.

Haul System

JAG SYSTEM

Haul kit

The JAG SYSTEM haul kit is designed for pick-offs, making a releasable anchor, or tensioning a system, with a 4:1 mechanical advantage and excellent efficiency (sheaves with sealed ball bearings).

The collapsed kit is highly compact, allowing it to be used even when the distance to the anchor is very short. The JAG SYSTEM haul kit is quick and easy to deploy: it is ready to use due to the flexible cover that helps prevent the risk of tangling. The haul end is color-coded for instant identification. It is available in three lengths: 1, 2, and 5 meters.

JAG TRAXION

High-efficiency double progress-capture pulley

The JAG TRAXION double progress-capture pulley is designed for use with the JAG pulley to make a 4:1 haul system. Sheaves with sealed ball bearings provide excellent efficiency.

JAG

High-efficiency double pulley

The JAG double pulley is designed for use with the JAG TRAXION double progress-capture pulley to make a 4:1 haul system. Sheaves with sealed ball bearings provide excellent efficiency.

Pulleys

Haul System

TWIN RELEASE
progress-capture pulley

TWIN RELEASE

Releasable double progress-capture pulley for haul systems

Releasable, the TWIN RELEASE progress-capture pulley is designed to set up 4:1 haul systems for work in confined spaces or for technical rescue. It's possible to release the cam using the ergonomic handle. When lowering heavy loads, the brake integrated into the moving side plate and the main faceted sheave with single-direction rotation offer additional braking and better control. The two sheaves provide excellent hauling efficiency. The swivel makes it easier to operate, allowing the pulley to be oriented under load and for carabiners, ropes, or slings to be directly connected.

Release of the cam and passage of the rope through the brake integrated into the main moving side plate, allows comfortable and precise control when lowering.

The cam can be locked in the open position to make it easier to feed slack.

ANCHORS

Anchors are the link between the safety system and the structure or terrain. To complement the standard anchor equipment, Petzl offers a lifeline device specific to horizontal progression and a complete set of accessories.

Rock and Concrete Anchors

Elements that allow installation of temporary or permanent fixed anchors.

Rigging Equipment

Swivels provide a solution to help prevent twisting and tangling ropes, especially when hauling. Rigging plates allow the workstation to be organized and increase the number of anchoring options. Rings allow multiple anchors to be organized.

Anchor Slings and Straps

Slings and anchor straps designed for setting up temporary anchors.

Quick-Adjustment Anchors

Temporary Horizontal Lifeline

Anchor Straps for Tree Care

Friction savers for tree care.

Anchors

Rock and Concrete Anchors

COEUR BOLT STEEL/STAINLESS/HCR

Anchors comprised of a COEUR hanger, a nut, and a bolt (pack of 20)

Different steels suited to various environments

Petzl anchors (hangers and bolts) use different types of steels to adapt the anchor to the environment in which it is used:

- Standard steel, designed for interior uses or non-permanent installations: **COEUR BOLT STEEL**
- 316L high quality stainless steel, designed for typical exterior uses: **COEUR BOLT STAINLESS**
- HCR 904 (High Corrosion Resistance) stainless steel, designed for ultra-corrosive environments: **COEUR BOLT HCR**

Hangers (COEUR STEEL, COEUR STAINLESS and COEUR HCR) and bolts (BOLT STEEL, BOLT STAINLESS, and BOLT HCR) are also available separately (pack of 20).

COEUR PULSE 12 mm

Removable anchor with locking function

The COEUR PULSE 12 mm is a removable, high-quality stainless steel anchor that can be installed and removed for reuse very simply and rapidly without tools. The locking function limits the risk of accidental removal. The COEUR hanger can rotate during installation and when laterally loaded during use, allowing it to better align with the systems in place.

How to install and inspect COEUR PULSE anchors

The anchor can be installed and removed for reuse very simply and rapidly, without tools.

Manual screw-lock function limits the risk of involuntary removal.

COLLINOX

Forged stainless steel glue-in bolt (pack of 10)

AMPOULE COLLINOX

Resin glue for COLLINOX (pack of 10)

BAT'INOX

Forged stainless steel glue-in bolt (pack of 10)

AMPOULE BAT'INOX

Resin glue for BAT'INOX (pack of 10)

MICRO SWIVEL

Compact gated swivel

The compact, gated MICRO SWIVEL is designed for attachment to a locking carabiner. It helps prevent twisting of lanyards and allows correct positioning of devices. Its design without bearings allows it to turn freely when not loaded and to stop moving when loaded in order to hold the devices in position.

SWIVEL OPEN

Gated swivel with sealed ball bearings

The SWIVEL OPEN gated swivel features a large opening and can be attached to a wide range of products (such as pulleys or lanyards). It reduces the bulk and weight of component systems and solves the twisting and tangling problems of ropes and lanyards. Sealed ball bearings offer excellent performance and reliability.

SWIVEL

Ball bearing swivel

Available in two sizes, the SWIVEL prevents the rope from twisting when the load is turning. Sealed ball bearings offer excellent performance and reliability.

PAW

Rigging plate

Available in three sizes, the PAW rigging plate can be used to organize a workstation and set up multi-anchor systems. The hole design allows ropes or slings to be threaded for direct connection. Made of forged aluminum, it offers an excellent strength-to-weight ratio.

RING

Connection ring

The RING connection ring can be used to create multiple anchors or be installed directly onto the SEQUOIA and SEQUOIA SRT harnesses' attachment bridges to improve the arborist's lateral mobility.

RING OPEN

Multidirectional gated ring

See page 58 for details on the RING OPEN multidirectional gated ring.

Anchors

Anchor Slings and Straps

ANNEAU

Sewn sling

ANNEAU is an open loop sling available in four lengths, color-coded for easy identification of length.

ST'ANNEAU

Lightweight sewn sling

ST'ANNEAU is a lightweight alternative to classic slings, available in three lengths, with color coding for easy identification of length.

PUR'ANNEAU

Ultra-light sewn sling

PUR'ANNEAU is a very lightweight sling with exceptional durability, thanks to its high-modulus polyethylene construction. It is particularly supple, for easy handling. Available in three lengths, color-coded for easy identification of length.

CONNEXION FIXE

Anchor strap

CONNEXION FIXE is a durable anchor strap with two forged steel attachment points. It offers several configurations for setting up an anchor: directly to an anchor point or around a suitable structure. It is available in three lengths: 100, 150, and 200 cm.

CONNEXION VARIO

Adjustable anchor strap

CONNEXION VARIO is a durable and adjustable anchor strap equipped with two forged steel attachment points. It offers several configurations for setting up an anchor: directly to an anchor point or around a suitable structure. The strap length can be adjusted using the adjustment buckle. A system keeps the remaining webbing stowed. It is available in two lengths: 30 to 200 cm and 200 to 400 cm.

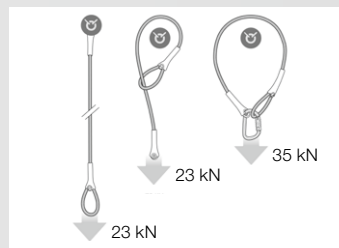

WIRE STROP

Anchor strap

WIRE STROP is an anchor strap made of 6.5 mm diameter galvanized steel with two terminations of different sizes. It offers several configurations for setting up an anchor: directly to an anchor point or around a suitable structure. The plastic sheath helps hold the connector in position and facilitates clipping. It is available in five lengths (50, 100, 150, 200, and 300 cm).

Anchor strap with two terminations of different sizes. The plastic sheath helps hold the connector in position and facilitates clipping.

It offers several configurations for setting up an anchor: directly to an anchor point or around a suitable structure.

Quick-Adjustment Anchors

GRILLON Anchor

Quick-adjustment anchor

The adjustable GRILLON anchor can be used to quickly set a fixed anchor point. The length of rope required to set it is easily adjusted with the integrated self-locking device. The removable protective sheath allows smoother rope glide while protecting the rope from abrasive surfaces. It is available in four lengths.

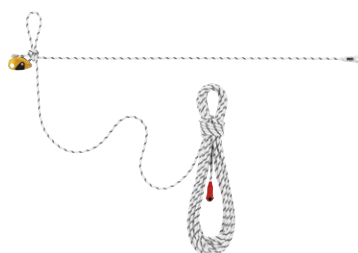

PROGRESS ADJUST-I Anchor

Lightweight quick-adjustment anchor

Lightweight and compact, the PROGRESS ADJUST-I adjustable anchor can be used to quickly set up a fixed anchor point. The rope length required to set it up is easily adjusted with the ADJUST rope adjuster. The removable protective sheath protects the rope while enhancing rope glide. It is available in three lengths: 2, 3, and 5 m.

Temporary Horizontal Lifeline

GRILLON lifeline

Temporary horizontal lifeline

GRILLON allows a horizontal lifeline to be installed quickly when there is a large work area to cover. The integrated self-blocking device allows easy adjustment of length, depending on the distance between two anchor points. It is available in four lengths to adapt to a variety of different situations.

Anchors

Anchor Straps for Tree Care

- **Adjustable**

The EJECT and NAJA friction savers are adjustable so they can adapt to different branch diameters.

- **Efficient**

The EJECT and NAJA friction savers are both equipped with a pulley mounted on sealed ball bearings. This improves rope glide through the anchor and optimizes rope ascents and movement in the tree.

- **Easily retrievable from the ground**

The EJECT and NAJA friction savers' thin construction reduces the risk of snagging during retrieval. The specially-designed retrieval balls make it easy to unlock the systems from the ground.

- **EJECT: Adjustable friction saver with choking function**

The adjuster on the EJECT friction saver allows you to precisely select the length of the strap to wrap or choke the tree trunk or branch. It is also possible to link two anchors for small branches. Unlocking the system is simple and quick, making it easy to retrieve from the ground.

EJECT adjustable friction saver

- **NAJA: Friction saver featuring a strap with four different adjustment positions**

The NAJA friction saver's adjustable strap has four different positioning loops, allowing you to better adapt to the diameter of the tree trunk or branch.

How to Use NAJA on a Single Rope (SRS)

How to Use NAJA on a Doubled Rope (MRS)

EJECT

Adjustable friction saver for tree care that is easily retrievable from the ground and has an integrated pulley and choking function

Designed for tree care, the EJECT friction saver allows the work rope to be set up without damaging the tree, even in narrow forks. It offers multiple setup configurations on one or two branches and has a choke adjuster that allows precise length adjustment of the friction saver. Rope ascents and movement in the tree are optimized with the very high-efficiency pulley, which facilitates rope glide at the anchor. The included retrieval ball makes the system easily retrievable from the ground.

Strap for EJECT

Strap for EJECT adjustable friction saver

This strap is specially designed for the EJECT adjustable friction saver. It can be used to replace the original strap or link two straps together to lengthen the friction saver and enable work on larger-diameter trees. It is available in two lengths: 150 and 250 cm.

Retrieval Ball for EJECT

Retrieval ball for EJECT adjustable friction saver

With a diameter of 21 mm, this retrieval ball is specially designed for the EJECT adjustable friction saver. It enables quick and easy system retrieval from the ground.

NAJA

Friction saver for tree care that is easily retrievable from the ground, with an integrated pulley and a strap with different adjustment positions

Designed for tree care, the NAJA friction saver allows the work rope to be set up without damaging the tree. The strap has four different adjustment positions to adapt to different branch diameters. Rope ascents and movement in the tree are optimized with the high-efficiency pulley, which facilitates rope glide at the anchor. The included retrieval ball makes the system easily retrievable from the ground.

Strap for NAJA

Strap for NAJA adjustable friction saver

This strap is specially designed for the NAJA adjustable friction saver. It can be used to replace the original strap or link two straps together to lengthen the friction saver and enable work on larger-diameter trees. It is available in two lengths: 150 and 250 cm.

Retrieval Ball for NAJA

Retrieval ball for NAJA adjustable friction saver

With a diameter of 21 mm, this retrieval ball is specially designed for the NAJA adjustable friction saver. It enables quick and easy system retrieval from the ground.

Anchors

Anchor Straps for Tree Care

TREESBEE

Friction saver for tree care, designed for ropes with spliced terminations

The TREESBEE anchor strap is used to improve rope glide at the anchor while protecting the tree from abrasion. It is designed for ropes with spliced terminations (the splice goes through the small ring). The galvanized steel rings provide great durability.

ROPES

The line of Petzl ropes is designed for professionals in the vertical world. They offer effective solutions for the requirements of various activities: rope access, technical rescue, industry.

Low Stretch Kernmantle Ropes

For Work at Height

Standard diameter low stretch kernmantle rope provides a good grip for easier handling.

AXIS 11 mm

For Rope Access

Low stretch kernmantle rope with small diameter provides very good performance in terms of flexibility and weight.

PARALLEL 10.5 mm

For Rescue

Low stretch kernmantle rope with a large diameter provides great strength and excellent handling when working with heavy loads.

VECTOR 12.5 mm

For Tree Care

Low stretch kernmantle rope with splice provides optimal performance when used with the ZIGZAG and ZIGZAG PLUS mechanical Prusiks.

FLOW 11.6 mm

CONTROL 12.5 mm

Static Ropes

For long descents, when intermediate anchors are not possible.

RAY 11 mm

Dynamic Rope

For progression using rock climbing techniques.

MAMBO 10.1 mm

Technical Cord

Cord for setting up Prusik hitches, anchors, or haul systems.

SEGMENT 8 mm

Accessory Cord

Cord for guiding a victim during rescue or for hauling equipment.

Cords 4, 5, 6, 7 mm

Rope Accessories

Professional rope accessories.

Identification Label for Petzl Ropes

Rope End Identification Kit

Rope Protectors

Devices that protect the rope at friction zones.

PROTEC

PROTEC PLUS

ROLLER COASTER

Low Stretch Kernmantle Ropes

A specific construction for each use and a choice of lengths and colors according to user needs.

• EverFlex technology: provides flexibility and handling over time

This technology provides great flexibility over time and under many different conditions (such as water, dust, and mud). The flexibility allows it to maintain consistent handling over the long run and perform optimally with devices.

• Multiple certifications

Petzl low stretch kernmantle ropes are certified to the following standards:

- European: CE EN 1891 type A
- American: NFPA 2500 (except FLOW 11.6 mm and CONTROL 12.5 mm, which allow working in compliance with the ANSI Z133 standard)
- Russian: EAC

• Available in several lengths and colors

Petzl low stretch kernmantle ropes come in several standard lengths, according to user needs and activities.

For work at height, rope access work and rescue

They are also available in six colors for easy differentiation of kits, work ropes, safety ropes, and collective access ropes.

For tree care

They are available in two colors, to differentiate working ropes from access ropes.

• Petzl Custom for ropes

Petzl Custom allows you to choose:

- Rope color
- Rope length
- Type of termination (sewn or not, only on low stretch kernmantle ropes)

• For work at height

Standard diameter low stretch kernmantle rope provides a good grip and compatibility with most devices.

• For rope access

Low stretch kernmantle rope with small diameter provides very good performance in terms of flexibility and weight.

• For rescue

Low stretch kernmantle rope with a large diameter provides great strength and excellent handling when working with heavy loads.

• For tree care

Low stretch kernmantle rope with splice provides optimal performance when used with the ZIGZAG and ZIGZAG PLUS mechanical Prusiks.

Ø 11,6 mm

Ø 12,5 mm

AXIS 11 mm

Low stretch kernmantle rope with good handling for work at height

The AXIS 11 mm low stretch kernmantle rope is designed for work at height. The standard diameter provides a good grip for easier handling. EverFlex technology provides great flexibility and consistent performance over time. Rope available in six colors and four lengths.

PARALLEL 10.5 mm

Low stretch kernmantle rope, flexible and lightweight for rope access

The PARALLEL 10.5 mm low stretch kernmantle rope is designed for rope access. The small diameter provides very good performance in terms of flexibility and weight. It has low elongation when under tension, increasing efficiency at the start of a rope ascent. EverFlex technology provides great flexibility and consistent performance over time. Rope available in six colors and four lengths.

VECTOR 12.5 mm

Low stretch kernmantle, high-strength rope with excellent handling, for rescue

The VECTOR 12.5 mm low stretch kernmantle rope is designed for rescue. The very large diameter provides great strength and excellent grip when handling heavy loads. EverFlex technology provides great flexibility and consistent performance over time. Rope available in six colors and four lengths.

FLOW 11.6 mm

Flexible and lightweight low stretch kernmantle rope, for tree care

The FLOW 11.6 mm low stretch kernmantle rope is designed for tree care. The small diameter provides very good performance in terms of flexibility and weight. It has low stretch when loaded, increasing efficiency when moving through the tree. EverFlex technology provides great flexibility and handling over time. It comes with a splice at one end for optimal rope glide through devices like a friction saver or pulley, and through tree branches. The small size of the splice allows it to pass through the friction chain of the ZIGZAG and ZIGZAG PLUS mechanical Prusiks. Rope available in two colors and three lengths.

CONTROL 12.5 mm

Low stretch kernmantle, high-strength rope with excellent handling, for tree care

The CONTROL 12.5 mm low stretch kernmantle rope is designed for tree care. The large diameter provides high strength and excellent grip. EverFlex technology provides great flexibility and handling over time. It comes with a splice at one end for optimal rope glide through devices like a friction saver or pulley, and through tree branches. The small size of the splice allows it to pass through the friction chain of the ZIGZAG and ZIGZAG PLUS mechanical Prusiks. Rope available in two colors and three lengths.

Install a CONTROL rope in a ZIGZAG mechanical Prusik

Ropes

Static Ropes

RAY 11 mm

Static kernmantle rope with good grip for work at height and technical rescue

The RAY 11 mm static rope is designed for work at height and technical rescue involving long descents when intermediate anchors are not possible. It has low elongation under load for optimal precision during progression and positioning. The standard diameter provides a good grip for easier handling. EverFlex technology provides great flexibility and consistent performance over time. Rope available in four colors and four lengths.

Dynamic Rope

MAMBO® 10.1 MM

Dynamic rope for progression using climbing techniques

The 10.1 mm diameter MAMBO dynamic rope is designed for work at height professionals who use climbing techniques for progression. The thick sheath improves abrasion resistance.

Technical Cord

SEGMENT 8 mm

Technical cord

The SEGMENT 8 mm technical accessory cord is used when setting up Prusik hitches, anchors, or haul systems. EverFlex construction provides great flexibility and consistent performance over time. Cord available in three lengths.

Accessory Cord

Cords

Accessory cords

These rugged and durable cords are for guiding a victim during rescue or for hauling equipment. Available in four diameters, in a 120-meter roll.

Rope Accessories

Rope End Identification Kit

The rope end identification kit can be used to replace old labels or to identify individual ropes for professional uses. It contains twenty pre-printed labels and twenty heat-shrink sheaths compatible with 10.5 to 13 mm ropes.

Identification Label for Petzl Ropes

Identification labels for marking Petzl professional ropes (pack of 10 pairs)

The identification labels can be used to replace old labels or establish a tracking system in order to more easily identify individual Petzl AXIS 11 mm, PARALLEL 10.5 mm, and RAY 11 mm ropes. They can quickly be installed on the end of the rope without using a tool. The labels are rigid, allowing for clear readability and longer-lasting markings.

Rope Protectors

PROTEC

Flexible protection for a fixed rope

The PROTEC flexible protector is designed to protect a fixed rope from abrasion when working at height or during rescue. Easy to install and durable, it's made for regular to intensive use. Versatile, PROTEC fits most rope diameters used by professionals, as well as anchor straps.

PROTEC PLUS

High-strength flexible protection for a fixed rope

With the help of its aramid construction, the PROTEC PLUS flexible protector is designed to protect a fixed rope from particularly abrasive surfaces or heat when working at height or during rescue. Easy to install and versatile, PROTEC PLUS fits most rope diameters used by professionals, as well as anchor straps.

ROLLER COASTER

Reversible rope protector on bearings for a moving rope

The ROLLER COASTER protector is designed to help protect a moving rope from abrasion. Reversible, with different frame shapes on either side that allow it to adapt to flat or angled surfaces. Multiple connection holes allow the use of different attachment methods. It's possible to connect multiple modules to better adapt to different types of terrain.

PACKS AND ACCESSORIES

To work comfortably, you need the right tools: packs, gloves, and accessories.
Petzl offers an entire range of innovative accessories, the result of numerous years of experience in the field.

Transport Bags

Robust and comfortable, these large-capacity bags are designed for organizing and transporting equipment to the worksite.

Packs

Comfortable and durable, these packs are designed for organizing and carrying equipment in a vertical environment.

Freestanding Bags

Even when empty, these bags maintain their shape when placed on the ground, for easy access to the equipment inside.

Tree Care Accessories

Specific products that help with placing an access rope in a tree.

Gloves

Protective gloves.

DUFFEL 65/85

Transport bag

Designed to be carried on any means of transport, the DUFFEL bags are ergonomic and comfortable. Padded back and shoulder straps make them comfortable to carry as a backpack. Removable shoulder straps make these bags versatile, providing different carrying options. The large opening allows easy access to equipment, including two pockets in the inner flap and a large side pocket for a helmet or shoes. A large transparent area allows rapid identification of the bag. Constructed with high-strength TPU tarp material, these bags are built for intensive use. The DUFFEL bags are available in two sizes: 65 or 85 liters, and in two colors: yellow/black or black.

Large D-shaped opening for easy equipment organization.

Padded, adjustable back and shoulder straps for comfortable carrying.

TRANSPORT 60

TRANSPORT 30/45/60

Durable pack

Designed for regular to intensive use, the TRANSPORT packs are comfortable and durable. The back panel and shoulder straps are padded with thermoformed foam to optimize comfort, even when carrying heavy loads. They are constructed with high-strength TPU tarp material to withstand intensive use without premature wear. With a practical, freestanding design, they can also be hauled, hung open at a workstation, or carried using one of the three durable handles. The TRANSPORT 45 and TRANSPORT 60 have a waistbelt to distribute the weight of the pack. They are available in three sizes: 30, 45, or 60 liters, and in two colors: yellow/black or black.

Back panel and shoulder straps are padded with thermoformed foam to optimize comfort when carrying heavy loads.

TRANSPORT was designed to stay upright. The user can easily access their equipment, even when the pack is sitting open on the ground.

Freestanding Bags

BUCKET 15

BUCKET 30

BUCKET 45

BUCKET 15/30/45

Freestanding bag

Simple and durable, BUCKET rope bags allow you to store up to 185 meters of 11 mm diameter rope. They're freestanding and keep their shape, even when empty, for easy access to the inside of the bag. They have an exterior pocket to store personal items and a marking area to quickly identify the contents of the bag. Made with TPU tarp material, they're designed to withstand regular to intensive use. The BUCKET 30 and BUCKET 45 are equipped with shoulder straps so they can be carried like a backpack. They are available in three sizes: 15, 30, or 45 liters, and in three colors: yellow, red, or black.

BUCKET bags can store 11 mm ropes:

- 45 meters of rope (BUCKET 15)
- 110 meters of rope (BUCKET 30)
- 185 meters of rope (BUCKET 45)

A roll top closure provides optimal protection against moisture.

TARP PRO

Large rope tarp

TARP PRO is a large rope tarp. It provides a 100 x 100 cm area to protect the rope from dust and dirt and can be quickly and easily stored in the BUCKET 30 or BUCKET 45 rope bags.

Packs and Accessories

Tree Care Accessories

JET

Throw-bag

Double-layer construction gives the JET throw-bag excellent longevity. Streamlined shape facilitates passage through tree branches. It is available in three versions: 250, 300, and 350 g.

AIRLINE

Throw-line

The AIRLINE throw-line offers an excellent compromise between flexibility and rigidity, for an accurate throw without the formation of knots as it comes out of the bag. The excellent sheath-core bond maintains a round cross section, providing good rope glide through the tree. It is available in two lengths: 60 and 300 meters.

ECLIPSE

Storage for throw-line

ECLIPSE provides easy storage for AIRLINE throw-lines and JET throw-bags. The double bottom allows two throw-lines to be stored separately. Once folded into the small bag, it all fits perfectly into the BUCKET.

JET throw-bag

Gloves

CORDEX

Lightweight belay/rappel gloves

These lightweight belay/rappel gloves combine the durability of a work glove with the precise fit and dexterity of a thinner glove. Double-layered leather protects the palm and other high-wear areas. The back is made of abrasion-resistant, breathable stretch nylon, providing comfort and fit. The low profile neoprene cuff with Velcro closure features a reinforced carabiner hole for attaching the gloves to your harness.

CORDEX PLUS

Belay/rappel gloves

These medium weight belay/rappel gloves offer extra protection without sacrificing dexterity. Double-layer leather and padding protect the palm from heat generated during long rappels or lowers. Fingertips and other high-wear areas are reinforced for increased durability. The back is made of leather with abrasion-resistant stretch nylon at key flex areas. The low profile neoprene cuff with Velcro closure features a reinforced carabiner hole for attaching the gloves to your harness.

CORDEX and CORDEX PLUS gloves

Accessories

MINO

Non-PPE accessory carabiner

MINO is a small, lightweight accessory carabiner ideal for hanging accessories on your harness. It is ergonomic and easy to use, even with gloves. MINO is sold individually or with two additional accessories (CAPTIV-type anti-rotation bar and LOCK-type locking bar). This product is not PPE (Personal Protective Equipment).

SPATHA

Clippable knife

The SPATHA knife is designed to accompany the worker at height during all daily tasks. The profile of the blade allows easy cutting of ropes and cords. It has a carabiner hole for easily attaching the knife to the harness. It is easy to manipulate with its textured wheel, even when wearing gloves, and can be locked in the open position.

CRAB 6

6-point crampons

Six-point crampons, adaptable to all shoe sizes, used for moving over talus and snow- and ice-covered slopes.

Rescue Kit

Ready-to-use kit, designed to pick off and lower a victim.

JAG RESCUE KIT

Temporary Vertical Lifelines and Fall-Arrest Kits

ASAP® VERTICAL LIFELINE

Vertical lifeline for protection against falls with ASAP mobile fall arrester

ASAP VERTICAL LIFELINE is a temporary vertical lifeline designed for belaying and to protect against falls from height. It contains an ASAP mobile fall arrester, an ASAP'SORBER energy absorber, three OK TRIACT-LOCK carabiners, an ANNEAU open loop sling, an ASAP'AXIS 11 mm rope with sewn termination and integrated energy dissipater, a weight, and a BUCKET bag. It is available in two lengths.

Customizable Helmets

VERTEX® CUSTOM

Customizable helmet from the VERTEX range

Petzl Custom offers customized helmets from the VERTEX range. There is a choice of shell (with or without ventilation) and of color (standard or fluorescent). Stickers with a logo and/or names can be printed, and colored reflective bands may be added. A wide range of accessories (chinstraps, protective eye and face shields, helmet protectors, nape protectors, name-tag holders, beanies) are available and may be pre-mounted. They are packaged individually for a ready-to-go solution. Minimum order quantity: 20 units.

STRATO® CUSTOM

Customizable helmet from the STRATO range

Petzl Custom can customize one of the helmets in the STRATO range. There is a choice of shell (with or without ventilation) and of color (standard or fluorescent). Stickers with a logo and/or names can be printed, and colored reflective bands may be added. A wide range of accessories (chinstraps, protective eye and face shields, helmet protectors, nape protectors, name-tag holders, beanies) are available and may be pre-mounted. They are packaged individually for a ready-to-go solution. Minimum order quantity: 20 units.

Customizable Work-Positioning Lanyard

GRILLON CUSTOM

Customizable Work-Positioning Lanyard

Petzl Custom can customize a work-positioning lanyard from the GRILLON range. You can choose the type of rope (standard or high-strength), the color, and the length (up to 20 meters). You can also choose the color of the device. The lanyard can be equipped with connectors for attachment to the harness or for the end. The GRILLON CUSTOM lanyard is packaged individually for a ready-to-go solution. GRILLON CUSTOM replacement ropes are also available individually.

Customizable Kit

JAG RESCUE KIT CUSTOM

Reversible and customizable rescue kit with JAG SYSTEM haul kit and I'D descender

Petzl Custom allows you to customize a JAG RESCUE KIT. Choice of color and length are offered for the AXIS 11 mm rope, from 10 to 185 meters. You can also choose anchor type, haul kit length, and either the I'D S or I'D EVAC self-braking descender with anti-panic function. The kit is delivered in a bag that corresponds to the selected rope length for a ready-to-go solution.

Customizable Personal Escape System

EXO® CUSTOM

Customizable personal escape system

Petzl Custom offers customized EXO personal escape systems. Choice of rope color and length, up to 150 meters, are available. You can also choose a descender with or without anti-panic function. The system can be equipped with connectors for attachment to the anchor and to the harness. The EXO CUSTOM personal escape system can be delivered in a bag for a ready-to-go solution. EXO CUSTOM replacement ropes are also available individually.

Customizable Ropes and Cords

SEGMENT 8 mm CUSTOM

Customizable technical cord

Petzl Custom offers customized SEGMENT cords. We offer the choice of length (up to 2000 meters) and the option to add a manufactured sewn termination to one or both ends. The SEGMENT 8 mm CUSTOM cord is packaged individually for a ready-to-go solution.

PARALLEL 10.5 mm CUSTOM

Customizable low stretch kernmantle rope for rope access

Petzl Custom can customize a PARALLEL 10.5 mm rope. We offer the choice of color, length (up to 700 meters), and the option to add a manufactured sewn termination to one or both ends. Markings at the end of the rope can also be customized with a heat-shrink cover or laser-marked rigid identification label. The PARALLEL 10.5 mm CUSTOM rope is packaged individually for a ready-to-go solution.

DURALINE 10.5 mm CUSTOM

High-strength, low stretch kernmantle rope that is customizable and made for work at height, rope access, and rescue

The DURALINE 10.5 mm CUSTOM low stretch kernmantle rope is designed for work at height, rope access, and rescue. Its aramid fiber sheath provides better resistance to abrasion, wear, and heat, than a classic rope. The thin diameter makes it flexible and lightweight. It's equipped with a rigid identification label on the end of the rope for better tracking and durability. The length and packaging are customizable to meet the needs of the user.

AXIS 11 mm CUSTOM

Customizable low stretch kernmantle rope for work at height

Petzl Custom can customize an AXIS 11 mm rope. We offer the choice of color, length (up to 700 meters), and the option to add a manufactured sewn termination to one or both ends. Markings at the end of the rope can also be customized with a heat-shrink cover or laser-marked rigid identification label. The AXIS 11 mm CUSTOM rope is packaged individually for a ready-to-go solution.

RAY 11 mm CUSTOM

Customizable static kernmantle rope for work at height and technical rescue

Petzl Custom can customize a RAY 11 mm rope. We offer the choice of color, length (up to 500 meters), and the option to add a manufactured sewn termination to one or both ends. The RAY 11 mm CUSTOM rope is packaged individually for a ready-to-go solution.

VECTOR 12.5 mm CUSTOM

Customizable low stretch kernmantle rope for rescue

Petzl Custom can customize a VECTOR 12.5 mm rope. We offer the choice of color, length (up to 500 meters), and the option to add a manufactured sewn termination to one or both ends. The VECTOR 12.5 mm CUSTOM rope is packaged individually for a ready-to-go solution.

Intelligent lighting for greater convenience and performance

This exclusive technology developed by Petzl instantly provides the right lighting at the right time, without any need for manual operation. Burn time is optimized so you can remain focused on the activity.

REACTIVE LIGHTING® technology provides:

- Intelligent lighting
- Hands-free lighting for greater convenience and performance
- Longer burn time

This feature is available in DUO RL and SWIFT RL headlamps.

Come face-to-face without blinding each other, for better teamwork

Once activated, the FACE2FACE function triggers a sensor that detects other DUO headlamps within 8 meters and automatically dims the lighting whenever they face each other. The light returns to its original intensity once the other headlamp is no longer in its line of sight.

This feature is available in DUO Z1 headlamps.

Choose the battery type that fits your needs

The HYBRID CONCEPT design allows Petzl's compact headlamps to run on either the CORE rechargeable battery or three AAA/LR03 batteries without an adapter.

- CORE rechargeable battery is an economical solution for frequent and/or intensive use
- AAA/LR03 batteries for occasional use with very long burn time

This feature is available in ARIA headlamps.

Compatible with a variety of helmet types

All Petzl headlamps are designed to be worn on the head or a helmet, and allow the headlamp to be tilted:

- On Petzl helmets, using their mounting plates

- On Petzl helmets, using specific mounting plates that are available as accessories

- On other helmets, using adhesive plates that are available as accessories

Choosing a Petzl headlamp means selecting a work tool designed to withstand the most severe conditions of use while providing maximum reliability:

Optical quality for optimal visual comfort

Petzl headlamps provide maximum visual comfort for the user: lighting is uniform and has no bright point in the center, no spotting, no dark areas. Each batch of LEDs is tested and selected according to proper color homogeneity, low energy consumption, and high luminous flux. Each Petzl headlamp is individually inspected before leaving the factory. These operations include a test to measure lighting performance and beam homogeneity with the help of a digital camera.

Perfectly uniform beam:
user comfort

Presence of a central bright spot:
blinding

Presence of visual defects:
lack of precision,
discomfort, fatigue

Testing from design to manufacturing

Each model must pass particularly stringent tests:

- For shock resistance, fall resistance, and crushing (including at low temperatures)
- For functional reliability (mechanical endurance)
- Individual inspection and test at the end of the assembly line (final quality check)
- For water resistance

Consideration of photobiological risk

Petzl has chosen to present information in its product instructions about the risks to the eyes associated with LED lighting. For this, the company uses the IEC 62778 and EN 62471: 2008 standards, Photobiological safety of lamps and devices using lamps. This standard classifies lamps according to risk groups.

The risk groups are as follows:

- Risk group 0: no risk
- Risk group 1: low risk. The product presents no risk related to exposure limits under normal usage conditions
- Risk group 2: moderate risk. The reflex to look away from the lamp suffices to reduce the risk

To learn more about photobiological safety and the information given in the Instructions for Use, see the technical information on LED lighting available at www.petzl.com

LED risk group 2 - IEC 62471

**Do not stare at operating lamp.
May be harmful to the eyes.**

**Ne regardez pas fixement le faisceau de la lampe de face.
Peut être dangereux pour les yeux.**

LED risk group 2 > LED risk group 1

0 1 m

A question of balance

Brightness and burn time are two inextricably linked parameters of any headlamp, regardless of its lighting technology. For a given quantity of energy, increasing the brightness automatically decreases burn time, and vice versa.

The different lighting technologies used in Petzl headlamps make it possible to meet your needs, depending on what you want:

Prioritizing burn time: STANDARD LIGHTING

Brightness decreases gradually as the batteries are drained. It is the most common technology.

Prioritizing guaranteed brightness over time: CONSTANT LIGHTING

Brightness stays constant as the batteries drain. When the batteries are almost drained, the headlamp switches automatically to reserve lighting, providing reduced brightness with longer burn time.

Optimized lighting performance: REACTIVE LIGHTING®

Brightness varies according to the user's need. Intelligent lighting optimizes battery life, offering longer burn time.

Brightness: the shape of the beam directly affects lighting distance

Lighting distance depends directly on brightness, but mainly on the shape of the beam. In fact, given the same brightness, lighting distance will vary depending on the shape of the beam.

Petzl indicates the different lighting modes available for each headlamp. These modes correspond to specific conditions of use: close-range work, moving around, seeing at a distance.

Environments and Standards

Hazardous Areas

If an explosion hazard is identified in an environment, the hazardous areas are classified as areas at risk, depending on the prevalence and type of combustible, gas or dust. All of the materials used in these zones must conform with current regulations for this type of zone (ATEX and/or HAZLOC).

Classification of ATEX / HAZLOC zones

Explosive Atmosphere	Gas Type Combustible		Dust Type Combustible	
	ATEX	HAZLOC	ATEX	HAZLOC
Permanent or Long-Term	ZONE 0	Class I Div 1	ZONE 20	Class II Div 1
Occasional	ZONE 1	Class I Div 1	ZONE 21	Class II Div 1
Accidental	ZONE 2	Class I Div 2	ZONE 22	Class II Div 2

Example of ATEX zone (gas type combustible)

For more information on ATEX and HAZLOC regulations, see www.petzl.com

How to read an ATEX marking

Example:
DUO Z1

	II 2 G	Ex ib	IIB	T4	Gb
	II 2 D	Ex ib	IIIB	T135°	Db

II 2 G ATEX CODING				
	II	2	GD	
EU Explosive atmosphere symbol	Equipment group	Equipment category		
	I: mining	M1: energised		
		M2: de-energised*		
	II: non-mining		Gas	Dust
		1: very high protection	0	20
2: high protection		1	21	
3: normal protection	2	22		

* in presence of explosive atmosphere

IIB GAS GROUPS	
Gas group	Representative test gas
I	Methane (mining only)
IIA	Propane
IIB	Ethylene
IIC	Hydrogen

Gases are classified according to the ignitability of gas-air mixture. Refer to IEC/EN 60079-20-1 for classification of common gases and vapors.

T4 / T135° TEMPERATURE CLASS	
T class	Maximum surface temperature
T1	450°C
T2	300°C
T3	200°C
T4	135°C
T5	100°C
T6	85°C

Ex ib ELECTRICAL PROTECTION CONCEPTS				
Standard IEC/EN	Code	Intrinsic Safety	Zone	
60079-11	Ex ia			0
	Ex ib	1		21
	Ex ic	2		22

IIIB DUST GROUPS	
Dust group	Representative test dust
IIIA	Combustible flyings
IIIB	Non-conductive dust
IIIC	Conductive dust

Gb / Db EQUIPMENT PROTECTION LEVEL	
Equipment protection level	Zone
Ga	0
Gb	1
Gc	2
Da	20
Db	21
Dc	22
Ma	energised*
Mb	de-energised*

G = Gas, D = Dust, M = Mining
* in presence of explosive atmosphere

Lighting performance as defined by the ANSI/PLATO FL 1 protocol

Petzl has chosen to comply with the ANSI (American National Standards Institute) FL 1 protocol to measure and demonstrate the lighting performance of our headlamps. This voluntary move allows users to easily compare the lighting performance of different headlamp models using standardized criteria.

Lighting Performance: How Is It Measured?

MAX
BRIGHTNESS

Brightness (lumens)

This measurement is taken between 30 and 120 seconds after the headlamp is turned on. It indicates the maximum light output when the lamp is first turned on using new batteries (included).

MAX
BURN TIME

Burn time (hours)

This is the length of time for which lighting remains optimal, from the moment the lamp is turned on until it drops to 10% of maximum light output. It then switches to reserve lighting.

MAX
DISTANCE

Lighting distance (meters)

This is the maximum distance between the lamp and the location where only 0.25 lux of illumination remains. The measurement is taken when the lamp is turned on, using new batteries. Lighting distance depends directly on brightness, but mainly on the shape of the beam.

RESERVE
LIGHTING

Reserve lighting (outside of the ANSI/PLATO FL 1 protocol)

In addition to these measures, Petzl offers reserve lighting. Reserve lighting provides a minimum light level to be able to move around. However, the lighting may be insufficient for certain activities (such as precision work or inspection).

The IP Protection Index

A headlamp's resistance to solids and/or liquids is indicated by its IP rating. This index classifies the level of protection offered by equipment against intrusions by solids (e.g. dust) and liquids (e.g. water, oil) according to the IEC 60529 standard.

Understanding the protection index

Protection against solid objects

X = Not measured

0 = Not protected

1 = Protected against projection of solids ≥ 50 mm in diameter

2 = Protected against projection of solids ≥ 12.5 mm in diameter

3 = Protected against projection of solids ≥ 2.5 mm in diameter

4 = Protected against projection of solids ≥ 1 mm in diameter

5 = Protected against dust (limited ingress, no harmful deposits)

6 = Completely protected against dust

Protection against liquids

X = Not measured

0 = Not protected

1 = Protected against vertically falling water drops

2 = Protected against water drops (15° from vertical)

3 = Protected against rain (60° from vertical)

4 = Protected against splashing water

5 = Protected against water jets

6 = Protected against powerful water jets

7 = Temporary immersion (-1 meter for 30 minutes)

8 = Prolonged immersion (deeper than 1 meter for period defined by manufacturer)

9 = Prolonged immersion (deeper than 1 meter) and protection against pressure-washing

Environments and Standards

Choosing your Petzl headlamp for hazardous areas in accordance with regulations:

		 ATEX	 HAZLOC	 WATER-PROOF	 STANDARD BATTERIES	 RECHARGEABLE

MAX BRIGHTNESS

Brightness is the total quantity of light emitted by a lamp. It is expressed in lumens. The greater the quantity of light, the better you see. The value indicated is that of the most powerful lighting level (MAX POWER).

RECHARGEABLE

Petzl headlamps that work with rechargeable batteries.

MAX DISTANCE

Lighting distance is linked to brightness and beam shape. It is expressed in meters and indicates the range of usable lighting. The value indicated is the maximum value.

STANDARD BATTERIES

Petzl headlamps that work with regular batteries (included).

MAX BURN TIME

Burn time expresses the length of time a headlamp functions with power sufficient for carrying out an activity. It is expressed in hours. The value indicated is the maximum value.

ATEX

Headlamp meeting ATEX certification requirements for work in hazardous environments.

RESERVE LIGHTING

When the battery is almost drained, the headlamp switches automatically to reserve lighting to provide minimum lighting for several hours.

HAZLOC

Headlamp meeting HAZLOC certification requirements for work in hazardous environments.

LARGE

Wide beam designed for proximity lighting, to see up close or around the feet. The wide angle provides a very large and comfortable field of view.

CHEMICAL RESISTANT

Better resistance to chemicals.

MIXED

Mixed beam consists of a wide beam and a focused component, allowing both proximity lighting and longer-range vision for moving around.

INGRESS PROTECTION

The IP rating on a headlamp indicates its degree of resistance to intrusions:
IPX4: Water-spray and weather resistant
IPX7: Resistant to temporary immersion (in up to 1 meter for 30 minutes)
IP67: Resistant to dust and temporary immersion (in up to 1 meter for 30 minutes)

FOCUSED

Focused beam allows focused lighting on a target in order to see objects or people at a distance.

IMPACT PROTECTION

The IK rating on a headlamp indicates its degree of protection against impacts.
IK05: Protected against a 0.70-joule impact, equivalent to the impact of a 0.2 kg mass dropped from 350 mm above the impacted surface.
IK06: Protected against a 1-joule impact, equivalent to the impact of a 0.5 kg mass dropped from 200 mm above the impacted surface.
IK07: Protected against a 2-joule impact, equivalent to the impact of a 0.5 kg mass dropped from 400 mm above the impacted surface.

RED LIGHTING

Red lighting for more comfortable night vision. This lighting allows good vision without blinding the user or members of a group.

WEIGHT

The weight indicated is that of the headlamp with its energy source (regular or rechargeable batteries).

RGB LIGHTING

Red, green, and blue lighting allows the user to better see contrasts in the lit object in certain situations.

2 m FALL

Resistance to falls (2 m).

WHITE / RED STROBE

Red and/or white strobe lighting allows you to signal and be more easily located, for example in an emergency.

80 kg CRUSHING

Resistance to crushing (80 kg).

DUO RL headlamp

DUO RL

Ultra-powerful and rechargeable multi-beam headlamp featuring REACTIVE LIGHTING® technology. 2800 lumens

Designed for technical rescue and worksites, the DUO RL rechargeable headlamp provides 2800-lumen brightness. Using REACTIVE LIGHTING® technology, a sensor analyzes the ambient light and automatically adjusts brightness to user needs. Manual operation is minimized and burn time is optimized, so the user can remain focused on the activity. The aluminum lamp body provides excellent impact resistance. The DUO RL is waterproof and ideal for use in wet environments. 3200 mAh rechargeable battery.

REACTIVE LIGHTING®

Longer burn time, greater visual comfort, and less manual operation with REACTIVE LIGHTING® mode: the light sensor automatically adjusts brightness and beam pattern, optimizing battery life.

INGRESS PROTECTION

Dustproof and waterproof in up to 3 meters of fresh water for 30 minutes.

Ultra-bright with 2800 lumens and multi-beam lighting to suit a wide variety of situations.

Aluminum lamp body provides excellent fall, crush, and impact resistance.

R2 rechargeable 3200 mAh lithium-ion battery with four-level gauge, for precise monitoring of battery charge level.

DUO Z1

Powerful, rechargeable multi-beam headlamp with FACE2FACE anti-glare function, certified for use in ATEX hazardous areas. 360 lumens

DUO Z1 is a headlamp with a maximum 360 lumens of lighting in BOOST mode that runs on a rechargeable battery. It is multi-beam, and has four lighting modes, making it adaptable to a variety of situations: close-range work, proximity lighting, movement, and long-range vision. Featuring the FACE2FACE anti-glare function, the DUO Z1 headlamp allows those working in a group to face each other without blinding one another, enabling them to work more effectively together. It can be worn on VERTEX and STRATO helmets with the included mounting plates. It meets ATEX zone 1/21 (II 2 GD Ex ib IIB T4 Gb IIIB T135° C Db) certification requirements for work in hazardous areas. 6400 mAh rechargeable battery.

XENA®

Powerful, rechargeable, lightweight, and balanced headlamp featuring CONSTANT LIGHTING technology. 1400 lumens

Designed for maintenance, industrial, inspection, and technical rescue professionals, the XENA headlamp offers an excellent weight-to-power ratio (185 grams / 1400 lumens). The battery pack is in the rear, making it balanced and comfortable to wear. Durable, it is fall and impact resistant. It is also waterproof and dustproof, making it suitable for various work conditions. Three beam types and five lighting levels provide optimal visual comfort in a variety of situations. CONSTANT LIGHTING technology provides stable lighting intensity over time. It features a rotating knob that is easy to use, even when wearing gloves. Wear the lamp on your head or mounted on a variety of helmet types using compatible accessories for a convenient solution. Rechargeable via USB-C, the 3200 mAh battery is removable and replaceable.

Powerful and lightweight, XENA casts 1400 lumens at 185 grams. The battery is worn in the rear for a more balanced and comfortable fit.

CONSTANT LIGHTING

CONSTANT LIGHTING technology provides stable brightness over a given amount of time.

USB TYPE-C

Lithium-ion 3200 mAh battery, rechargeable via USB-C port, with battery charge indicator.

The XENA headlamp comes with two SLOT ADAPT plates so it can be installed on a Petzl helmet.

Accessories

NEW 2024

R1

Rechargeable battery for the XENA headlamp. 3200 mAh

The R1 rechargeable battery provides excellent lighting performance for the XENA headlamp, even at low temperatures. It recharges with a USB-C port and has a five-level gauge for precise monitoring of the battery charge level. It is equipped with red lighting for visibility from behind and can be used as a spare battery to charge other electronic devices.

NEW 2024

R1 Extension Cord

Extension cord for the XENA headlamp

Extension cord for the XENA headlamp R1 battery, allowing it to be carried separately to reduce weight on the head, as well as preserve battery and headlamp performance when temperatures are low.

POCHE PIXA & SWIFT RL

Compact and Durable Headlamps

- **Guaranteed lighting over time**

CONSTANT LIGHTING

CONSTANT LIGHTING technology provides lighting that remains stable as the batteries drain. When the batteries are almost drained, the headlamp switches automatically to reserve lighting, providing reduced brightness with longer burn time (except PIXA Z1).

- **Lamps for use in hazardous areas: ATEX or HAZLOC certification**

ATEX

HAZLOC

Designed to withstand the harshest environments, PIXA headlamps can be used in explosive atmospheres. Depending on the model, they are certified ATEX or HAZLOC.

Learn about choosing the ATEX or HAZLOC headlamp that best meets your needs, page 92.

- **Rugged, durable construction**

Lockable rotary switch

Easy to use, even when wearing gloves. May be locked to prevent inadvertently turning on the light, with a storage position that protects the lens.

Great mechanical strength

Shocks, falls, crushing: these lamps endure the daily rigors of a professional work site.

Waterproof and chemical resistant

PIXA headlamps are waterproof (IP67) and have been tested for resistance to various chemicals.

- **For close-range work, movement, and long-range vision**

PIXA Z1 Headlamp

100 lm	95 m	56 h
MAX BRIGHTNESS	MAX DISTANCE	MAX BURN TIME

PIXA® Z1

Headlamp for use in ATEX hazardous areas, suitable for proximity lighting, movement, and long-range vision. 100 lumens

The PIXA Z1 headlamp is durable and versatile. The multi-beam adapts to a variety of different situations: close-range work, movement, and long-range vision. It meets ATEX zone 1/21 (II 2 GD Ex ib IIB T4 Gb IIIB T135° C Db) certification requirements for work in hazardous areas.

90 lm	90 m	11 h 30
MAX BRIGHTNESS	MAX DISTANCE	MAX BURN TIME

PIXA® 3R

Rechargeable headlamp for use in ATEX hazardous areas, suitable for proximity lighting, movement, and long-range vision. 90 lumens

The PIXA 3R headlamp is a durable, rechargeable headlamp suitable for frequent use by professionals. The multi-beam adapts to a variety of different situations: close-range work, movement, and long-range vision. CONSTANT LIGHTING technology: brightness does not gradually decrease as the batteries are drained. It meets ATEX zone 2/22 (II 3 GD Ex ic IIB T4 Gc IIIC T135° C Dc) certification requirements for work in hazardous areas. 930 mAh rechargeable battery.

100 lm	90 m	26 h
MAX BRIGHTNESS	MAX DISTANCE	MAX BURN TIME

PIXA® 3

Headlamp for proximity lighting, movement, and long-range vision. Available in ATEX or HAZLOC versions. 100 lumens

The PIXA 3 headlamp is durable and versatile. The multi-beam adapts to a variety of different situations: close-range work, movement, and long-range vision. CONSTANT LIGHTING technology: brightness does not decrease gradually as the batteries are drained. Available in two versions: ATEX zone 2/22 (II 3 GD Ex nA ic IIB T4 Gc tc, IIIC T135° C Dc) or HAZLOC (Class I Div 2 Groups C, D and Class II Div 2 Group G, T4).

80 lm	55 m	26 h
MAX BRIGHTNESS	MAX DISTANCE	MAX BURN TIME

PIXA® 2

Headlamp suitable for proximity lighting and movement. Available in ATEX or HAZLOC versions. 80 lumens

The PIXA 2 is a durable headlamp that offers comfortable lighting for tasks close at hand and helps maximize safety when the worker is moving around. CONSTANT LIGHTING technology: brightness does not decrease gradually as the batteries are drained. Available in two versions: ATEX zone 2/22 (II 3 GD Ex nA ic IIB T4 Gc tc, IIIC T135° C Dc) or HAZLOC (Class I Div 2 Groups C, D and Class II Div 2 Group G, T4).

60 lm	15 m	16 h
MAX BRIGHTNESS	MAX DISTANCE	MAX BURN TIME

PIXA® 1

Headlamp for proximity lighting. Available in ATEX or HAZLOC versions. 60 lumens

The PIXA 1 is a durable headlamp offering lighting that allows the user to work comfortably on tasks close at hand. CONSTANT LIGHTING technology: brightness does not decrease gradually as the batteries are drained. Available in two versions: ATEX zone 2/22 (II 3 GD Ex nA ic IIB T4 Gc tc, IIIC T135° C Dc) or HAZLOC (Class I Div 2 Groups C, D and Class II Div 2 Group G, T4).

Compact and Durable Headlamps

Accessories

Rechargeable Battery for PIXA® 3R

Lithium-ion polymer rechargeable battery. 930 mAh

Rechargeable lithium-ion polymer battery, 930 mAh, recharges separately or on the headlamp for quick charge.

PIXADAPT

Accessory for mounting a PIXA or SWIFT RL headlamp on a helmet

The PIXADAPT allows the user to mount or remove a PIXA or SWIFT RL headlamp from a helmet at any time, while maintaining the ability to tilt the lamp. PIXADAPT is compatible with Petzl helmets with or without an eye shield. For other helmets, verify compatibility with the helmet manufacturer.

RUBBER

Rubber headband for the PIXA or SWIFT RL headlamp, compatible with a variety of helmet types

The RUBBER headband adapts to a variety of different helmets on the market and holds a PIXA or SWIFT RL headlamp securely in position.

Ultra-Compact and Versatile Headlamps

• Ultra-compact

Ultra-compact, ARIA headlamps can be easily stored in a toolbox.

• Waterproof and durable

ARIA headlamps are designed to meet the needs of professionals: waterproof (IP67), impact resistant (IK07), and fall resistant up to 2 meters.

• Easy to use

The single button on ARIA headlamp allows you to access every lamp function: on/off, lighting levels, lighting colors (black version only), lock, and battery level.

• Practical

The HYBRID CONCEPT design allows the headlamps to function with standard AAA/LR03 batteries or with a CORE rechargeable battery. The headlamp automatically detects the energy source and optimizes lighting performance. With a rechargeable CORE battery, the lamp provides more brightness when it is turned on and throughout the duration of use.

The headband allows ARIA headlamps to be worn on the head or around the neck. They can also be mounted on a helmet, with mounts available as accessories: HELMET ADAPT (compatible with a variety of helmet types) and SLOT ADAPT (for helmets with compatible slots).

• For frequent use, lamps with rechargeable battery

ARIA 2R

Compact, rechargeable, durable, and waterproof headlamp, with lighting designed for proximity vision and movement. 600 lumens

Casting 600 lumens, the compact and rechargeable ARIA 2R headlamp was specifically designed to be used by tradespeople and maintenance professionals. It is durable, impact- and fall-resistant, as well as waterproof and dustproof, making it suitable for various working conditions. Easy to use, with a single button for controlling all lamp functions. The wide, uniform beam provides comfortable proximity lighting and the mixed beam makes moving around easier. It is convenient and can be worn on the head, around the neck, and on different types of helmets, using mounting plates that are available as accessories. With its HYBRID CONCEPT design, ARIA 2R comes with the 1250 mAh CORE rechargeable battery but also works with three standard batteries.

 MAX BRIGHTNESS	 MAX DISTANCE	 MAX BURN TIME
--------------------	------------------	-------------------

ARIA 1R

Compact, rechargeable, durable, and waterproof headlamp, designed for proximity lighting. 450 lumens

Casting 450 lumens, the compact and rechargeable ARIA 1R headlamp was designed to be used by tradespeople and maintenance professionals. Durable, it is fall and impact resistant. It is also waterproof and dustproof, making it suitable for various work conditions. Easy to use, with a single button for controlling all lamp functions. The uniform wide beam offers comfortable close-range vision. It is convenient and can be worn on the head, around the neck, and on different types of helmets, using mounting plates that are available as accessories. With its HYBRID CONCEPT design, ARIA 1R comes with the 1250 mAh CORE rechargeable battery but also works with three standard batteries.

ARIA 2 RGB

 MAX BRIGHTNESS	 MAX DISTANCE	 MAX BURN TIME
--------------------	------------------	-------------------

ARIA 2 / ARIA 2 RGB

Compact, durable, and waterproof headlamp, designed for proximity lighting and movement. 450 lumens

Casting 450 lumens, the ARIA 2 compact headlamp was designed to be used by tradespeople and maintenance professionals. Durable, it is fall and impact resistant. It is also waterproof and dustproof, making it suitable for various work conditions. Easy to use, with a single button for controlling all lamp functions. The wide, uniform beam provides comfortable proximity lighting and the mixed beam makes moving around easier. It is convenient and can be worn on the head, around the neck, and on different types of helmets, using mounting plates that are available as accessories. ARIA 2 comes with three standard batteries and is also compatible with the CORE rechargeable battery, with its HYBRID CONCEPT design. The ARIA 2 RGB features red/green/blue lighting.

ARIA 1 RGB

 MAX BRIGHTNESS	 MAX DISTANCE	 MAX BURN TIME
--------------------	------------------	-------------------

ARIA 1 / ARIA 1 RGB

Compact, durable, and waterproof headlamp designed for proximity lighting. 350 lumens

Casting 350 lumens, the ARIA 1 headlamp was designed to be used by tradespeople and maintenance professionals. Durable, it is fall and impact resistant. It is also waterproof and dustproof, making it suitable for various work conditions. Easy to use, with a single button for controlling all lamp functions. The uniform wide beam offers comfortable close-range vision. It is convenient and can be worn on the head, around the neck, and on different types of helmets, using mounting plates that are available as accessories. ARIA 1 comes with three standard batteries and is also compatible with the CORE rechargeable battery, with its HYBRID CONCEPT design. The ARIA 1 RGB features red/green/blue lighting.

Ultra-Compact and Versatile Headlamps

Accessories

CORE

Rechargeable battery compatible with Petzl HYBRID headlamps. 1250 mAh

High-capacity 1250 mAh lithium-ion rechargeable battery for Petzl headlamps featuring the HYBRID CONCEPT design: ARIA 1, ARIA 1R, ARIA 2, and ARIA 2R. It provides excellent lighting performance, even at low temperatures. It recharges directly with the integrated USB port. The CORE rechargeable battery offers an economical solution as the main power supply or as a back-up battery.

SLOT ADAPT

Plate for mounting an ARIA headlamp on a Petzl helmet

Plate for mounting a headlamp from the ARIA range on a Petzl VERTEX or STRATO helmet, while maintaining the ability to adjust headlamp tilt.

HELMET ADAPT

Adhesive plate for mounting an ARIA headlamp on a helmet

Adhesive plate for mounting a headlamp from the ARIA range on a helmet.

UNI ADAPT

Adhesive clip for mounting a Petzl headlamp on a variety of helmet types (pack of 4)

Spare Headband for ARIA

Spare headband for headlamps from the ARIA range.

SHELL L

Pouch for storing ultra-compact headlamps from the ARIA range.

Emergency Headlamp

MAX BRIGHTNESS

e+LITE®

Ultra-compact emergency headlamp. 40 lumens

Ultra-lightweight and highly compact, the e+LITE emergency headlamp is the one to always have with you. With a carrying case, it's always ready to use and can be stored with its batteries for ten years in a backpack, vest, or emergency kit, or used as a back-up headlamp. It casts 40 lumens of continuous or strobe, white or red lighting, so you can be seen. The whistle integrated in the elastic headband allows the user to signal an emergency. Weighing only 26 grams, e+LITE is an ideal emergency headlamp.

Continuous or strobe lighting (white or red) allows you to be seen and to signal an emergency.

© Marc Daviet

Climbing

Whether climbing at a crag or on an indoor wall, Petzl is constantly imagining new solutions for dedicated climbers, or for those simply seeking a moment to recreate and be social.

© Rémi Flament

Caving

Petzl's roots are in subterranean exploration! For over 50 years, since the development of our very first headlamps, rope clamps and descenders, we have shared a profound connection with explorers of the deep.

© Mathis Dumas

Ice Climbing

Ice climbing is very technical and requires highly specialized equipment. Gullies, couloirs, icefalls: climbing these ephemeral formations always brings an extra bit of adventure.

© Mathis Dumas

Mountaineering

Deploy every technique for progression on snow, ice, or rock. Put your skills to the test and choose the right gear. Do whatever it takes to reach the summit and find your limit.

© Sam Bié

Canyoning

A combination of hiking, climbing, and swimming in whitewater, canyoning has become a major outdoor activity in recent years, even outside the summer season.

© Sam Bié

Via Ferrata

Via ferrata is the most approachable way to discover the vertical environment, via a route made of cables, ladders, and steps on a rock wall. It's a wonderful introduction to more technical pursuits.

© Jeremiah Watt

After Dark Outdoor Activities

Disconnect from everyday life and get back to nature for an evening or a weekend. Make your days longer; stargaze, observe the wildlife, or simply share a moment around a campfire with family or friends.

© Marc Davlet

Night Running

Get out of the house, hit the trails or run the city streets. Running gives you a fresh perspective on your daily life, whether your goal is to spend time in nature or push your limits in training.

© James Roh

Tactical, Special Forces

Tactical operations in a hostile environment require maximum safety in every situation, so being able to count on the quality and performance of the equipment is essential.

Exploring New Horizons

The Petzl Foundation's mission is to support and initiate public interest projects through its activities in mountainous and vertical domains; projects that help bring balance to humankind's place in its natural, cultural, and economic environments. The foundation supports non-profit organizations through financial and equipment grants, as well as consultation and training.

Our courses of action:

Prevent accidents in vertical environments

Encourage mountain exploration

Support ecological transition in mountainous areas

Vertical Archaeology in Peru with Ukhupacha

Ukhupacha is an organization that enables scientists from around the world to explore inaccessible archaeological sites. Over the last 20 years, numerous archaeological expeditions throughout South America, including to Machu Picchu, Peru, have led the organization to develop the concept of Vertical Archaeology. Their goal is to train scientists and archaeologists to be proficient in vertical rope progression techniques, allowing them to safely and efficiently conduct research.

In October 2022, the Ukhupacha technical team spent a month in Pitumarca, in the Cusco region of Peru. Perched above the village at an altitude of 3500 meters, a striking limestone climbing area has been developed over the last few years by the local climbing community and the organization, 7a Escalada. Ukhupacha's mission has been to spread awareness about accident prevention within the climbing community, and to train Rondas Campesinas in basic rescue techniques. The aim is to teach them how to evacuate someone using a litter or to transport patients to medical centers from the remote areas where they live. At the end of the trip, members of Ukhupacha were able to explore two areas with great caving and archaeological potential.

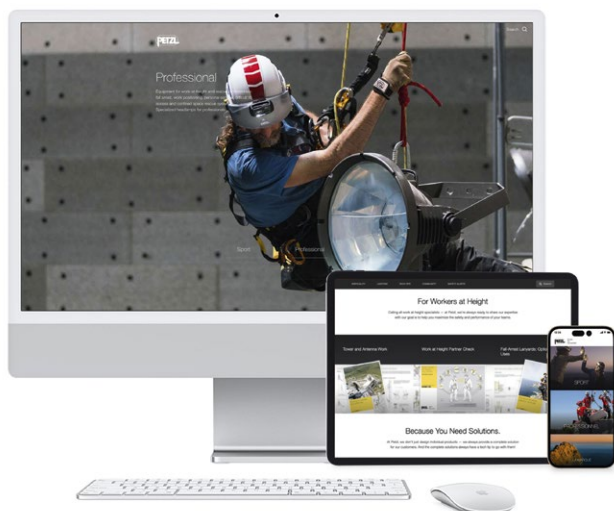

In addition to financial support, the Petzl Foundation donated technical equipment that was made available to 7a Escalada and the community of Pitumarca. This has given them the tools to organize rescues for climbers or locals who regularly use the steep trails and sometimes experience falls or accidents.

Support: €20,000, including technical equipment
